Internal Capital Adequacy Assessment

- The Bank conducts Internal Capital Adequacy Assessment Process (ICAAP) to manage its capital resources so that profits, capital and risk are managed in a consistent and efficient manner

ICAAP

- A process for demonstrating the appropriate management of risks facing a company so that it can achieve its business objectives, and for the appropriate maintenance and control of a sufficient level of internal capital to cover these risks

Risk Appetite

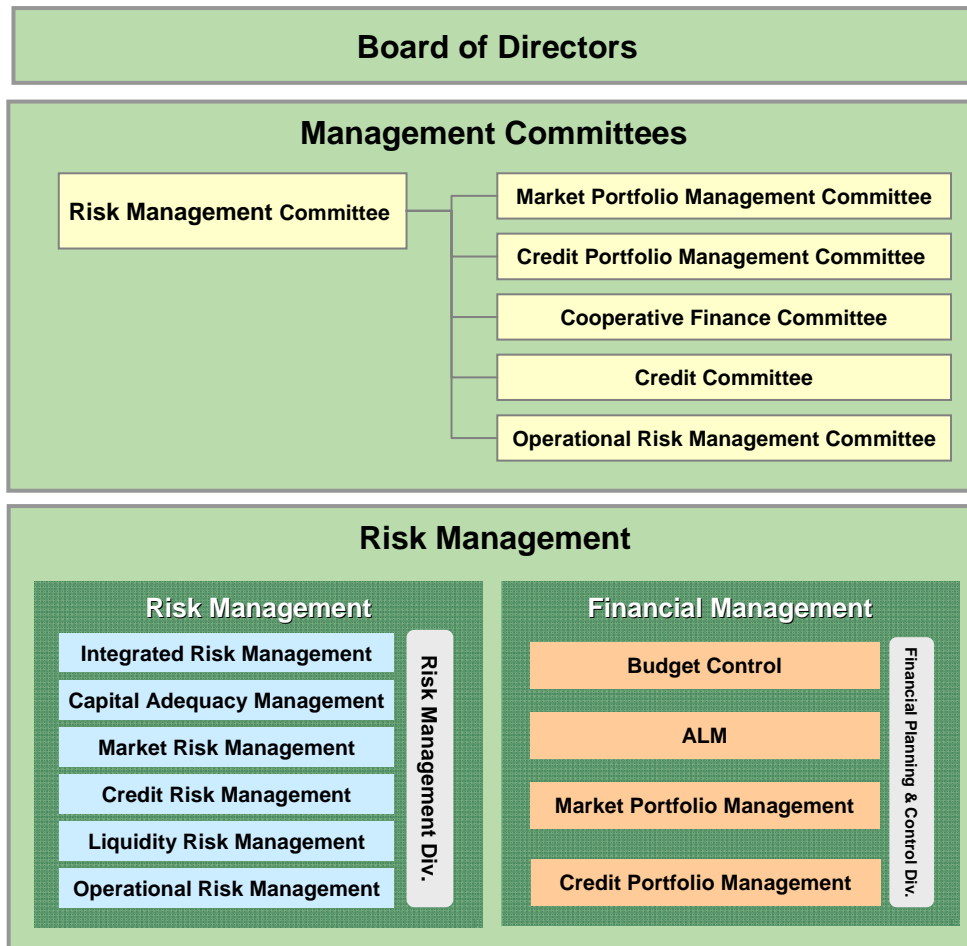

- In implementing the Bank's strategies, risk appetite reflects specific views on risk-taking, and defines what types of risk and magnitude of risk the Bank is willing to accept.
- To return profits in a stable manner to its members, the Bank seeks to take on risk through globally diversified investment by maintaining sufficient capital.
- The Bank's portfolio management strategy (asset allocation policy) for executing globally diversified investments is viewed as the manifestation of risk appetite.

Business Operations Consistent with the Risk Appetite

- The Bank develops its budgets and management plans that are consistent with its risk appetite, and performs financial and business management in a fine balance with risks and its capital position.
- To maintain a sufficient level of capital, the Bank performs stress tests on a regular basis and manages its capital adequacy by monitoring checkpoints.

Risk Management System

- The Bank has employed an “integrated risk management” system with a central focus on economic capital management

1. Board of Directors

- The Board of Directors sets business objectives in the form of medium-term management plans, risk appetite, management plans and budgets based on them. It also determines a risk management framework for their implementation.
- Based on feedbacks from internal and external audits, the board keeps track of the risk management regimes.

2. Management Committees

- The Risk Management Committee discusses and determines important issues associated with the management of economic and regulatory capital and the handling of respective risks.
- Based on the determination, each relevant committee, such as the Market Portfolio Management Committee and Credit Portfolio Management Committee, sets concrete portfolio management policies.

3. Risk Management

- As part of its integrated risk management efforts, the Bank has established individual units to watch over market risk, credit risk, liquidity risk and operational risk as well as a unit to supervise such units. Their roles and responsibilities have been clearly defined.
- Through its integrated risk management efforts, the Bank, under its risk management framework, has established its financial management practices flexible enough to ensure that it maintains sound and profitable business performance and, at the same time, to strike an optimal balance among risk, profit, and capital in volatile markets and in constantly changing economic and financial environments.
