The Cooperative System and the Cooperative Banking Business

The cooperative banking business, through its network covering all of Japan, contributes to the development of the agriculture, fishery and forestry industries in Japan, and provides financial support for the livelihood of local citizens.

The Cooperative System and the Cooperative Banking Business

In addition to “banking business,” which involves accepting deposits and making loans, our cooperative members engage in a number of other business activities. Among these are providing “guidance” for business and day-to-day matters for farmers, fishermen and foresters; “marketing and supplying” through the sale of agricultural, fisheries and forestry products as well as procurement of production materials; and “mutual insurance” as insurance coverage for various unforeseen events.

Cooperative members that perform this wide range of activities comprise JA, JF and JForest at the municipal level and their respective federations and unions at the prefectural and national levels (as indicated in the accompanying chart). This nationwide structure from the municipal level to the national level is generally known as the “cooperative system.”

The framework and functions of the banking businesses of (1) JA and JF at the municipal level and their respective federations and unions at the prefectural and national levels (as indicated in the accompanying chart). This nationwide structure from the municipal level to the national level are referred to collectively as the “cooperative banking business.”

Business Activities of Cooperatives

• Japan Agricultural Cooperatives (JA)

JA are cooperatives, established under the Agricultural Cooperative Law, that conduct a wide range of businesses and activities in the spirit of mutual assistance. The principal business activities of JA encompass (1) offering guidance for improving individual members’ management of their farms and their standards of living; (2) providing marketing and supplying functions for farming, including the gathering and selling of crops, and supplying materials needed for production and daily living; (3) providing mutual insurance, such as life and auto insurance; and (4) offering banking services, such as accepting deposits, making loans and remitting funds.

As of April 1, 2016, there were 659 JA throughout Japan that contribute to the development of the agricultural industry and rural communities through their various businesses and other activities.

• Japan Fishery Cooperatives (JF)

JF are cooperatives established under the Fishery Cooperative Law with the objective of overseeing and protecting the businesses and lives of fishermen. The principal business activities of JF include (1) providing guidance for the management of marine resources and for the improvement of individual members’ management of their business and production technology; (2) marketing and supplying for individual members for the storage, processing and sale of caught fish and other marine products, and for the supply of materials required for their business and daily lives; (3) banking services, including the acceptance of deposits and lending of needed funds; and (4) mutual life and non-life insurance. There were 960 JF throughout Japan (as of April 1, 2016) that contribute to the development of the fishery industry and fisheries communities through a broad range of activities in various parts of the country.

• Japan Forestry Cooperatives (JForest)

JForest, established under the Forestry Cooperative Law, are cooperatives for private forest owners. The ownership structure of Japan’s forests consists mostly of small forest owners, and forestry cooperatives play an important role in organizing and representing their interests.

The principal business activity of JForest is forest improvement, which involves planting, undergrowth removal and the thinning of forests owned by individual members, as well as the sale of forest products, such as logs and timber.

Playing a central role in forestland improvement, 629 JForest members (as of April 1, 2016) throughout Japan
Structure of the Cooperative System
contribute to helping forests perform their diverse range of natural functions, including the supply of timber and other forest resources, preservation of national land, protection of watersheds, maintenance of living environment, and provision of places for health and relaxation.

**Position of the Bank within the Cooperative Banking Business**

The Bank was established in 1923 as the central bank for Japan’s industrial cooperatives. It was renamed The Norinchukin Bank in 1943 and is now a private financial institution based on the Norinchukin Bank Law.

JA, JF and JForest were created with the aim of improving the economic and social positions of farmers, fishermen and foresters through the cooperative efforts of their respective individual members under the slogan “one for all and all for one.”

The Bank is a national-level cooperative financial institution whose membership (i.e. shareholders) comprises the previously mentioned municipal-level cooperatives, prefectural-level federations and other organizations. Furthermore, the Bank plays a major role in Japanese society as a contributor to the development of the nation’s economy and as a supporter for the advancement of the agriculture, fishery and forestry industries with facilitated finance for its members under the provisions of Article 1 of the Norinchukin Bank Law.

The Bank’s funds are derived from member deposits (the majority of funds held at the Bank are deposits of individual members of JA and JF) and the issuance of Norinchukin Bank debentures. The Bank also raises capital in financial markets. These financial resources are then lent to farmers, fishermen, foresters and corporations connected to the agriculture, fishery and forestry industries, local governments and public entities. In addition to the aforementioned activities, the Bank efficiently manages its funds through investments in securities and other financial instruments. The Bank stably returns to its members profits on investment and lending activities and provides various other financial services. Through these various services and activities, the Bank plays a major role as the national-level financial institution for cooperatives.

### Article 1 of the Norinchukin Bank Law

As a financial institution based on agricultural, fisheries and forestry cooperatives as well as other members of the agriculture, fisheries and forestry cooperative system, the Bank contributes to the development of the nation’s economy by supporting the advancement of the agriculture, fishery and forestry industries by providing financial services for the member organizations of the cooperative system.

### Current State of Japan’s Agriculture, Fishery and Forestry Industries

- **Agricultural Industry**

There are many problems surrounding agriculture, including a shortage of operators in agricultural, fishery and forestry communities and expansion of abandoned farmland due to a dwindling population and an aging society, uncertainties are mounting. Moreover, in the Trans-Pacific Partnership (TPP) negotiations, a broad agreement was reached among participating countries in October 2015 and a signing ceremony was held in February 2016. The participating countries are expected to push ahead with ramification procedures in the months ahead.

Against this backdrop, the government decided to aim to double agricultural and rural income in the next ten years in the “Agriculture, Forestry and Fisheries/Local Communities Revitalization Plan” revised in June 2014. Towards this, the government is promoting measures aimed at increasing agricultural income, through the increase of agricultural output and reduction of production costs, and increasing the related income of rural regions through sixth industrialization, etc.

In November 2015, the Japanese government formulated the “Comprehensive TPP-related Policy Framework” to undertake the legislation of related measures, while at the same time engaging in the ongoing consideration of matters with the goal of moving toward specific details in the autumn of 2016. To this end, in beginning of 2016, the Liberal Democratic Party created the Study Policy Formulation Project Team, the Council for Industrial Competitiveness and the Council for Regulatory Reform to proceed with discussions pertaining to ongo-

3. Overseas accounts have been excluded from the Bank’s balances.
4. The Bank’s deposits include not only those from JA Group but also those from JF and JForest Groups and other financial institutions.
ing consideration of matters including the realization of lower of production material costs and an advantageous distribution and processing structure for producers, and enhanced human resource and export capabilities.

There is strong demand for the JA Group to continue pushing ahead with self-reform with the aim of turning the agricultural industry into growing industry. In response, at the 27th National Meeting of Japanese Agricultural Co-operatives held in October 2015, the JA Group decided on “Self-Reform of JA Group” initiatives aimed at increased income for agricultural workers, etc., and are making every effort to ensure their realization.

**Fishery Industry**

Amid deteriorating fishing grounds, declining resources, a decreasing number of existing fishermen caused by the aging population and aging fishing production facilities, the fishing industry continues to experience harsh conditions. However, fishery product and the amount of consumption of fisheries product appears to have bottomed out, while the ratio of younger fishermen is on the rise, demonstrating a partial improvement.

Given these circumstances, the Fisheries Agency formulated and is steadily implementing the Fishery Industry Revitalization Plan, aimed at revitalizing the fishing industry and fishing villages. Furthermore, the agency has provided support for the introduction of fishing vessels that enhanced fishery industry competitiveness, strengthened resource management and resource survey and supported income stabilization measures through the utilization of fishing industry mutual insurance framework and supported measures for fisheries processing and distribution facility repairs and exports. Fisheries cooperative organizations are now collaborating more closely with the government and relevant groups so that Japan’s fishery industry can continue to develop.

**Forestry Industry**

Japan’s forests cover about 25 million hectares, or about two-thirds of the country’s land mass. Private forests, which account for about 70% of the forest area in Japan, are not properly cared for and have become unproductive partly due to the trend of aging population and depopulation in rural mountain villages and a lower interest in entering the forestry sector, where wood prices have been in a long-term slump. Also, it is becoming difficult for cedar and cypress forests throughout Japan planted after World War II to properly perform their diverse range of natural functions and become resources even though the trees are nearing the time when they can be fully utilized.

Under these circumstances, a new Basic Plan for Forest and Forestry was approved at a Cabinet meeting held in May. This new plan indicates forest resources become ready for full utilization and heightened expectations for forest and timber industry contributions to regional revitalization. As the forests and the forestry industry transition period approaches, there is a demand for the invigoration of mountain communities through effective and efficient forestland improvement for the multifaceted functioning of the forest, the realization of sustainable forest management with final cutting and appropriate reforestation and a stable supply of domestic lumber.

In light of forestry policy trends, the JForest Group is engaged in initiatives the next five year cooperative campaign (2016–2020) “JForest Movement for the Creation of Future Forestlands, Forestry Industry and Mountain Villages—Creating Local Communities Using Forests for the Next Generation” aimed at realizing three objectives: (1) improved economic benefits for individual members through efficient and stable forestry management, (2) the invigoration of local communities through the activation of forestry industry and related industries, and (3) contributions to citizen lifestyles by leveraging the high-level, multifaceted functions of forests.
Operations of the JA Bank System

JA, JA Shinnoren and The Norinchukin Bank, which are members of JA Bank, work under a framework for integrated and systematic cooperation in each business activity. We call this framework the “JA Bank System,” and our aim is to become a financial institution that is more trusted and chosen by its members and customers.

What is JA Bank?
- JA Bank is the Name of a Group of Financial Institutions

The JA Bank System consists of JA, JA Shinnoren and The Norinchukin Bank, which are together referred to as JA Bank members. The JA Bank System functions essentially as one financial institution, possessing one of the largest networks among private financial groups in Japan.

As of April 1, 2016, JA Bank contained 662 JA, 32 JA Shinnoren and The Norinchukin Bank, for a total of 695 entities.

Reorganization and Strengthening Law (Law Concerning the Reorganization and Strengthening of Credit Business by the Bank and Specified Cooperatives)
• Comprehensive Strategy of JA Bank

Every three years, JA Bank formulates the JA Bank Medium-Term Strategies as its comprehensive management and business strategies. From fiscal 2016 onwards, the Bank has set its future vision at becoming an “entity that is needed more in regions by contributing to food, agriculture and local communities” and formulated the JA Bank Medium-Term Strategies (fiscal 2016 through fiscal 2018) that sets out measures to fulfill this vision. JA, JA Shinnoren and the Norinchukin Bank will engage in role-sharing while: (1) serving as the main bank for the agricultural industry; (2) engaging in initiatives that connect agriculture with local communities; (3) providing financial services that support people’s everyday lives in the local community; and (4) working to win greater trust from customers.

JA Bank Medium-Term Strategies (Fiscal 2016 through fiscal 2018)
As the main bank for Japan’s agricultural industry, JA, JA Shinnoren and The Norinchukin Bank work in unison to enhance financial services for the agricultural industry. In addition to proper provision of financial services to small- and medium-sized farmers, especially regular members, JA Bank has enhanced its “agricultural financial centers function” in each prefecture to better address the wide-ranging needs of large-scale farmers and agricultural corporations. Specific initiatives being taken are based on proactively visiting agricultural corporations; providing agricultural loans and consultations, implementation of the “Support Program for Increasing Agricultural Income and Revitalizing Local Communities,” expanding JA Bank interest subsidy operations related to feed rice, capital for agricultural corporations; holding business conferences; and offering business matching services and export assistance.

We also established “Prefectural Leader Support Centers” in all prefectures in collaboration with the Prefectural Unions of Agricultural Cooperatives (JA Chuokai) and the Prefectural Marketing and Supplying Federation of Agricultural Cooperatives (JA Keizairen), and built a structure for the banking, marketing and supplying, mutual insurance and guidance businesses to work as one to provide comprehensive support to leaders.

In addition, JA Bank has focused on developing human resources, such as personnel in charge of agricultural loans. As of March 31, 2016, a total of 7,970 had been certified as JA Bank Agriculture Financial Planners, an agriculture financial certification established in fiscal 2011.

JA Bank is expanding its handling of financial products (“agricultural support financial products”) that translate into increased consumption of domestic agricultural products through the “No to Ayumu Project” (Project for Making Progress with Agriculture) in pursuit of agricultural and regional development. We are also engaged in financial support aimed at improving the convenience and appeal of farmers market.

With the aim of becoming the main bank for individual members and customers in all aspects of their lives, JA Bank, JA, JA Shinnoren and The Norinchukin Bank work in unison and endeavor to help each customer live an affluent life.

We propose products and services including savings, loans, receipt of salaries and pensions and credit cards tailored to life events from the customer’s perspective. We are also working on developing a structure to offer inheritance advice in consideration of senior citizens’ needs, strengthening the proposal-making ability of our sales and counter staff, enhancing JA’s structure to improve customer satisfaction and training employees so that they can meet customers’ expectations and prove worthy of their trust.

The JASTEM System, a unified nationwide IT system managed by the Bank for JA Bank, is JA Bank’s core infrastructure needed to provide a consistent level of service to users everywhere in Japan. While fulfilling our social responsibility, we are upgrading the system to create greater convenience for JA and its individual members and customers and to fulfill and streamline the functions required for JA business operations.

To upgrade to the next-generation system when the current system’s lifecycle ends, JA Bank is sorting out work and system issues, coordinating medium-to long-term business strategies and the framework for an infrastructure upgrade plan, and conducting a working-level review.

Based on the JA Bank Basic Policy, JA Bank Headquarters receives management-related information from all JA Bank members and reviews them to confirm that they meet certain standards. This system makes it possible to foresee potential issues well in advance and provide early guidance prior to any early stage corrective action by the government.

In addition, the JA Bank Support Association, a designated support corporation founded based on the Reorganization and Strengthening Law, has established the JA Bank Support Fund with financial resources contributed by JA
Bank members nationwide. This fund can inject capital and provide other needed support to JA Bank members.

Through these initiatives, we are striving to establish a banking business that enjoys even greater trust from and is used more by individual members and customers.

**Trends of Cooperative Members and the Cooperative Banking Business**

- **Trends of JA Funds**

In fiscal 2015, JA deposits rose 2.4% year on year (a 2.0% increase in deposits from individuals), to a year-end balance of ¥95,918.7 billion. This was largely due to an increase as a result of providing financial services meeting customers’ needs.

Although JA focused on expanding personal loans, especially mortgage loans, total loans declined 1.7% year on year, to a year-end balance of ¥20,636.1 billion. This was mainly due to a decrease in the balance for loans for local governments and public entities. Securities held by JA decreased 1.8% year on year, to a year-end balance of ¥4,163.0 billion.

- **Reorganization of JA Bank Business**

To deal effectively with changes in the operating environment of the agricultural industry as well as individual members and JA, JA Bank has rationalized and streamlined the organization and business of its cooperative banking system.

The Bank has added the JA Shinnoren in Gunma (transfer completed in October 2014) and the JA Shinnoren in Chiba (transfer completed in January 2015), and has conducted the following organizational streamlining by shifting from a three-tier structure consisting of JA at the municipal level, JA Shinnoren at the prefectural level, and The Norinchukin Bank at the national level to a two-tier structure of JA and The Norinchukin Bank. This was achieved by the completed business transfer of JA Shinnoren in twelve prefectures (Aomori, Miyagi, Akita, Yamagata, Fukushima, Tochigi, Gunma, Chiba, Toyama, Okayama, Nagasaki, and Kumamoto) to the Bank.

Elsewhere, the goal of “one JA in each prefecture,” whereby the rights and obligations of both JA Shinnoren and JA Keizairen (Prefectural Marketing and Supplying Federations of Agricultural Cooperatives) in a prefecture are integrated and taken over by a single JA in the prefecture, has been achieved in three prefectures in total (i.e., Nara, Shimane and Okinawa Prefectures) to date, following the addition of Shimane Prefecture (integrated and taken over by JA Shinnoren in November 2015).

The Bank will continue to steadily support JA’s functional and system reforms and make efforts to rationalize and streamline the operations of the Bank itself with the goal of creating a cooperative banking structure capable of meeting the expectations and winning the trust of both individual members and customers.
Operations of JF Marine Bank

JF Marine Bank provides financial support to fishing communities and appropriate financial functions for the fishery industry

■ What is JF Marine Bank?
• JF Marine Bank is the Name of a Group of Financial Institutions

JF Marine Bank is the name of a nationwide financial group consisting of JF Marine Bank members (JF that engage in the cooperative banking business including deposits and loans, JF Shingyoren and The Norinchukin Bank) and JF Zengyoren (National Federation of Fishery Cooperative Associations).

As of April 1, 2016, JF Marine Bank members totaled 112, consisting of 82 JF that offer financial services and 29 JF Shingyoren and The Norinchukin Bank.

JF Marine Bank Members

- JF that offer cooperative banking services
- JF Shingyoren
- The Norinchukin Bank

*Number of JF Marine Bank members: 112 (As of April 1, 2016)

■ Direction of JF Marine Bank
• JF Marine Bank Basic Policy

JF Marine Bank formulated its Basic Policy in January 2003, based on the provisions of the Reorganization and Strengthening Law. The objectives of the Basic Policy are: (1) to protect depositors by ensuring that JF Marine Bank conducts business in a sound and proper manner and (2) to properly respond to the financial needs of individual members and customers by restructuring JF Marine Bank’s business, organization and management.

• Framework for Bankruptcy Prevention

To further increase the adequacy and soundness of business operations, all JF Marine Bank members are required to submit management data to JF Marine Bank Headquarters, where such data is examined. JF Marine Bank Headquarters can prevent organizations, such as JF, that have problems with their operations, from falling into bankruptcy by quickly identifying issues and taking preventive actions, thereby creating a system that assures depositors’ peace of mind. These activities are taken under the guidance of The Norinchukin Bank and JF Shingyoren.

In addition to these activities, JF, JF Shingyoren and The Norinchukin Bank have jointly established the JF Marine Bank Support Fund and set up a framework for encouraging the voluntary efforts of cooperative members toward organizational and business reforms.

JF, JF Shingyoren and The Norinchukin Bank also participate in the Agricultural and Fishery Cooperative Savings Insurance System, a public savings insurance system.

• JF Marine Bank Safety System (Stable and Responsible JF Cooperative Banking Business System)

JF Marine Bank provides community-based financial functions for the fishery industry and assumes an essential role in fishing communities. To make improvements that will ensure that JF Marine Bank has a management system appropriate for a member of Japan’s financial system, the “system of one fishery cooperative banking business in each prefecture” has been carried out. Under the system, JF and JF Shingyoren in the same prefecture conduct in unison the cooperative banking business. As a result, a fishery cooperative banking business had been established in each prefecture by the end of fiscal 2009.

With the goal of making this foundation even stronger and achieving sound and efficient business operation, we are proceeding with examination of the strengthening of management and the building of new management structures such as inter-regional JF Shingyoren. In regards to business development, the basis of sound operations, we are working to enhance financial functions for the fishery industry and ensure business performance based on the JF Marine Bank Medium-Term Business Promotion Policy.

As a cooperative banking institution, JF Marine
Bank believes that its purpose is to serve not only its individual members and customers, but also communities and society. To these aims, JF Marine Bank continues its efforts to further strengthen the JF Marine Bank Safety System (Stable and Responsible JF Cooperative Banking Business System) and respond to the financial needs of the fishery industry suited to the area.

**Management Framework of JF Marine Bank**

- **Trends of JF Funds**
  The balance of deposits held with JF Bank increased 2.7% year on year, to ¥2,565.6 billion as of March 31, 2016.
  
  The balance of loans at JF Bank fell 4.6% year on year, to ¥560.2 billion, due to such factors as easing of demand for new financing amid a harsh environment for fisheries business.

- **Reorganization of JF Marine Bank Business**
  JF cooperative banking business is being reorganized to create a more sound and efficient management system. As of April 1, 2016, the banking business operating system consists of integrated Shingyoren to which banking business was transferred from JF to JF Shingyoren (27 prefecture-level organizations), multiple independent JF centering on JF Shingyoren (two prefecture-level organizations) and one JF per prefecture (five prefecture-level organizations).
  
  Also, the number of JF engaged in banking business (including one JF per prefecture) had been reduced to 82 as of April 1, 2016 from 875 on March 31, 2000.
  
  At the same time, the total number of JF, including those not engaged in banking business, decreased by four in fiscal 2015. As a result, the number of JF stood at 960 as of April 1, 2016, reflecting progress made toward consolidation.
  
  In the future, greater emphasis will be placed on policies to strengthen and reorganize JF cooperative banking business under the JF Marine Bank Safety System (Stable and Responsible JF Cooperative Banking Business System), which serves as a framework for JF Marine Bank’s business management.
  
  The Norinchukin Bank supports these initiatives at JF cooperative members.
JForest Group Initiatives

■ Current State of Cooperative Activities
JForest Group has established the JForest Movement for the Creation of Future Forestlands, Forestry Industry and Mountain Villages—Creating Local Communities Using Forests for the Next Generation, a new cooperative campaign policy that runs from fiscal 2016 through fiscal 2020. JForest Group is carrying out the following three agendas: (1) enhance an efficient business base through the consolidate forest management and utilization of advanced technologies, (2) build a stable supply system of domestic lumber leveraging the cooperative system’s economies of scale and (3) create an open organization trusted by individual members and society, JForest Group will play a key role in regenerating Japan’s forests and the forestry industry.

■ Norinchukin Bank Initiatives
In addition to providing financial support for JForest Group’s various initiatives, the Bank provides nonfinancial support and works so that JForest Group can play a key role in Japan’s forestlands and forestry industry.

• Forest Rejuvenation Fund (FRONT80)/Nochu Potential Forest Productivity Fund
In order to promote activities aimed at the sustainable demonstration of the multi-faceted roles of forests, through the revitalization of private forests in danger of becoming deserted, the Norinchukin 80th Anniversary Forest Rejuvenation Fund (FRONT80) was established in 2005 (final offers in fiscal 2013). In the nine years between 2005 and 2013, we received 319 applications from all over the country, and from among them we have selected 52 projects and have provided subsidies totaling ¥942 million.

From fiscal 2014, in order to promote efforts for the consolidation of facilities and provide a boost to forestry cooperatives, taking into account changes to JForest’s surrounding environment such as governmental policies, we began soliciting applications for the Nochu Potential Forest Productivity Fund that has been established as a successor to FRONT80. In the two years between fiscal 2014 and 2015, we received 83 applications, we decided on ¥274 million in subsidies after selecting 14 from among them.

• Support for Initiatives to Consolidate Forest Management
The Bank has undertaken new initiatives toward “forestry labor safety improvement measures” aimed at improving labor safety and recruiting leaders practice consolidated forest management. The Bank subsidizes safety equipment purchased by JForest and JForest Moriren (Prefectural Federations of Forestry Cooperatives) engaged in measures to improve labor safety. In fiscal 2015, the first year of these activities, ¥92 million was provided to forestry cooperatives and prefectural federations of forestry cooperatives in all 47 prefectures throughout Japan for 321 projects.

• Support to Expand Domestic Lumber Use
JForest Group is working to expand the use of domestic lumber, and the Bank is also supporting JForest Group in its efforts. In April 2013, a financing scheme was established for forestry cooperatives and federations actively involved in the building of distribution and sales systems for lumber. In fiscal 2015, the loan facilities were established for 45 projects totaling ¥7.8 billion.

In anticipation of increased demand for domestic lumber due to the widespread use of woody biomass power generation, JForest Moriren (National Federation of Forest Owners’ Cooperative Associations), Norinchukin Research Institute and the Bank established the Cooperative Woody Biomass Study Group in August, 2013. We are also looking into the sharing of information inside JForest Group as well as the provision of support in accordance with local circumstances.

In addition, as support for initiatives which contribute to the expansion of domestic lumber use and forest conservation, the Bank has been engaging in the donation of wood products made from local lumber, sponsorship for tree-planting events, and subsidization of tree cultivation activity expenses, and in fiscal 2015, provided subsidies totaling ¥36 million to 43 prefecture-level organizations for 49 projects, as well as donating wood products worth ¥60 million to 17 parties in areas affected by the Great East Japan Earthquake.
JA Bank has been taking steps since fiscal 2013 to train “staff who will take the lead in transforming and innovating JA and related prefectural-level organizations” and “those who will be chosen and trusted by customers.” To expand these human resource development initiatives in an integrated manner nationwide, the Bank’s division that develops human resources for JA and JA Shinnoren, Norinchukin Academy, and JA Shinnoren’s human resource related division are unified under the name of the JA Bank Academy.

Specifically, we have been engaged in the expansion and provision of level-specific training for JA and JA Shinnoren employees, including continuing the “JA Bank Central Academy – Managers Course” (cumulative total of 464 participants as of March 31, 2016) targeted at directors engaged in the banking business of JA and the “JA Bank Central Academy – Senior Executives Course” (cumulative total of 199 participants as of March 31, 2016) targeted at JA Shinnoren’s general managers and “JA Bank Central Academy – Senior Managers Course,” targeted at senior managers engaged in the cooperative banking business of JA.
• Human Resource Training Initiatives at JF Marine Bank

In accordance with the JF Marine Bank Medium-Term Business Promotion Policy (fiscal 2015 through fiscal 2017), JF Marine Bank has been putting its efforts into the development of human resources needed to continue sufficiently fulfilling its role as a fishery-dedicated financial institution for cooperative organizations into the future, such as training financial consultants for the fishery industry and providing appropriate financial services required by the coastal population.

In fiscal 2015, JF Marine Bank continued with the JF Marine Bank Level-Specific Training - Branch Manager Course (with 40 participants in fiscal 2015), which was launched in fiscal 2013, targeted at branch managers of JF Shingyoren, etc. in addition to national conferences for financial consultants for the fishery industry and compliance workshops for directors of JF and JF Shingyoren on a continuing basis.

■ Personnel Exchanges between the Bank and JA or JA Shinnoren

The Bank has enhanced personnel exchanges between itself and JA and JA Shinnoren, and has been working to achieve mutual understanding and sharing of know-how within JA Bank Group.

Specifically, the Bank accepts trainees from JA to train them so that they can play a key role in banking business and gain wide-ranging business know-how. The Bank also accepts staff and trainees seconded from JA Shinnoren, and they work in various areas such as retail planning, administration, systems, agricultural and corporate loans, and securities investment. Moreover, the Bank sends staff as secondees to cooperative organizations (e.g. JA, JA Shinnoren and JA Chuokai (Prefectural Unions of Agricultural Cooperatives)) in order to deepen their understanding of the actual work of cooperatives from the point of view of employees of the central organization for cooperatives as well as financial institution for farmers, fishermen and foresters.

■ Support for Human Resources Training for JForest Group

JForest Group has been engaged in training engineers (e.g. forestry management planners) to advance proposal-based forest management consolidation, as well as focusing on strengthening auditing and compliance systems for cooperatives.

The Bank has sent lecturers for compliance training and has held an organization of seminars for JForest and JForest Moriren (Prefectural Federations of Forestry Cooperatives) targeting the top executives of forestry cooperatives. In addition, from fiscal 2014, JForest conducted “JForest Counsellor Training” (cumulative total of 75 participants from 39 prefectures by fiscal 2015) aimed at personnel holding the title of counsellor, who support the backbone of JForest’s practical management.

JA Bank Central Academy – Managers Course
Safety Net for the Cooperative Banking System

JA Bank and JF Marine Bank have established a safety net based on the Bankruptcy Prevention System and the Agricultural and Fishery Cooperative Savings Insurance System to provide an increased sense of security for their individual members and customers.

- **Bankruptcy Prevention System**
  JA Bank and JF Marine Bank have developed their own respective systems to prevent JA and JF from bankruptcy.

  Specific functions of these systems include: (1) monitoring of the business conditions of individual JA and JF to identify problems at an early stage, (2) taking steps at the earliest stage possible to prevent bankruptcy, and (3) injecting necessary funds drawn from the JA Bank Support Fund or the JF Marine Bank Support Fund*, the funds of which are collected from JA Bank and JF Marine Bank members nationwide, in order to maintain the sound management of individual JA and JF.

*As of March 31, 2016, the balance of the JA Bank Support Fund was ¥170.8 billion, and that of the JA Marine Bank Support Fund was ¥22.7 billion.

- **Agricultural and Fishery Cooperative Savings Insurance System**
  When a member organization of the cooperative banking system, such as JA or JF, becomes unable to reimburse deposited funds to its individual members and customers, this system provides policy coverage for depositors and ensures settlement of funds, thereby contributing to the stability of the cooperative banking system. The system is the same as the Deposit Insurance System, for which banks, shinkin banks, credit associations and labor banks are members.

  The Agricultural and Fishery Cooperative Savings Insurance System has been established under the Agricultural and Fishery Cooperative Savings Insurance Law. It is managed by the Agricultural and Fishery Cooperative Savings Insurance Corporation, which has been established jointly by the Japanese government, the Bank of Japan, The Norinchukin Bank, JA Shinryoren, JF Shingyoren and other entities.

  When funds are deposited in agricultural or fishery cooperatives covered by the system, the deposits are automatically guaranteed by this system.

  Even though the blanket deposit insurance system was fully discontinued on April 1, 2005, payment and settlement deposits (deposits that satisfy the following three conditions: (1) bearing no interest, (2) being redeemable on demand, and (3) providing normally required payment and settlement services) are still fully protected by the system. However, all other types of deposits are only covered up to ¥10.0 million in principal (per depositor at each cooperative organization), plus interest accrued.

  As of March 31, 2016, the balance of the reserve fund of the Agricultural and Fishery Cooperative Savings Insurance System was ¥381.9 billion.
Safety Net for the Cooperative Banking System

Financial Institutions and Savings Covered by the Savings Insurance System, and the Scope of Protection
