

Overview of business in the most recent fiscal year

1 Situational overview

Global economy made solid growth in fiscal 2023, particularly in the United States, which led to major central banks continuing their tightened monetary policies. Whilst the tightened monetary policies led inflation to ease, concerns about high inflation becoming entrenched amid buoyant private sector demand and employment conditions persisted.

Turning to the financial markets, the equity markets both in Japan and overseas performed strongly under the solid economic growth. In the bond markets, both short- and long-term interest rates rose amid ongoing monetary tightening in Japan and overseas. Japan saw a notable shift in its long-lasting monetary policy stance, with the Bank of Japan progressively abandoning yield curve control and ending its negative interest rate policy. In the foreign currency markets, the yen weakened as a result of difference of interest rate conditions and the anticipated speed of monetary policy changes between Japan and abroad.

In AFF industries, addressing food security risks is now a key issue for the global community given the high rise in food, energy, and other commodity prices against the backdrop of climate change, global population growth, and the intensification of international tensions. In Japan, which relies on imports for grain, fertilizers and feedstuff, agricultural management has been seriously affected by problems such as persistently high production material costs and slow progress of the cost transfer to sales prices. The Bank will continue to provide maximum support for the various AFF industry-related stakeholders affected by this issue, as the mission of a financial institution that operates with a foundation of the AFF industries and related local communities.

2 Business Performance in Fiscal 2023

In fiscal 2023, the Bank conducted business operations based on its Medium-Term Management Plan “Catch the Winds of Change. Create New Value,” covering five years since fiscal 2019.

As unprecedented “non-continuous changes” are expected, the Bank aimed at being “the leading bank that supports the AFF industries, food production and consumption and the daily lives of local communities,” and implemented initiatives to realize sustainable growth and offer value to society to continue to fulfill its mission of contributing to the development of the AFF industries. This was based on five missions to “Contribute to the Global Environment,” “Contribute to the AFF Industries and Local Communities,” “Enhance the Members’ Management Base,” “Secure a Sustainable Financial/Profit Base,” and “Maximize Organizational Vitality.”

(1) Contribute to the Global Environment

We set new targets for reducing exposures in the oil and gas, steel and coal sectors with the aim of achieving net zero greenhouse gas (GHG) emissions of investees and borrowers by 2050. We focused on engagement (constructive dialogues) to influence investees’ and borrowers’ response to environmental and social issues, enhancing initiatives to provide solutions to investees and borrowers such as support with the origination and sales of sustainable finance and carbon credits, as well as various consulting operations. In addition, to further advance sustainability disclosures, which is becoming of increasing importance in Japan and abroad, we issued our Climate & Nature Report 2024 in light of the Task Force on Climate-related Financial Disclosures (TCFD) recommendations and the Taskforce on Nature-related Financial Disclosures (TNFD) recommendations.

(2) Contribute to the AFF Industries and Local Communities

In the agriculture industry, we engaged in initiatives such as consulting to leaders by proposing solutions that would contribute to increasing incomes after clarifying management problems for the respective leaders. In the fishing industry, we engaged in problem-solving support for fishery environment conservation and on-the-ground issues in the fishing industry. In addition, given the ongoing price hikes in production materials, we engaged in efforts in both financial and non-financial aspects to support farmers, fishermen and foresters, together with cooperative members.

We set up initiatives to support users affected by the 2024 Noto Peninsula Earthquake, such as establishing a disaster consultation desk together with JA Bank and JF Marine Bank soon after the disaster, and informing and responding to users concerning financial measures.

(3) Enhance the Members’ Management Base

JA Bank engaged in support to enhance life plan initiatives at JA and enhance its product lineup to further perform its financial

intermediary function under the current JA Bank Medium-Term Strategies (fiscal 2022-2024). In addition, we promoted the implementation of non-face-to-face services focused on the convenience of our members and users.

JF Marine Bank has formulated a new JF Marine Bank Medium-Term Strategies for the three years from fiscal 2024, positioned as “a period for reforming the business and operations (a reform period).”

By practicing and assisting the members’ efforts, the Bank promotes contribution to the sustainable development of the AFF industries and turning them into growth industries.

(4) Secure a Sustainable Financial/Profit Base

In addition to the substantial increase in funding costs due to the higher-for-longer interest rates and the ongoing uncertain market environment amid the monetary policy for central banks and geopolitical risks, etc., unrealized losses on securities have increased due to the rise in overseas long-term interest rates. On the other hand, we strive for prudent financial management and have maintained a sound capital ratio and so on.

In addition to enhancing the product lineup at our asset management subsidiary to acquire external income sources and provide investment opportunities to our members, our private equity subsidiary conducted its first buyout investment since its establishment through the strengthening of sourcing of excellent projects.

(5) Maximize Organizational Vitality

We introduced the “job group system” to record the areas of business and expertise to be enhanced for each employee as a framework aimed at self-directed career formation and fostering expertise, while formulating a human resources portfolio strategy that establishes various measures to identify the necessary human resources and to form the human resources to realize the next medium-term vision. We prepared for operating a human resources portfolio aligned with the management strategy.

In addition, we engaged in promoting open innovation to improve the convenience for customers and improve efficiency and productivity, through measures including the operations of the innovation laboratory and JA Accelerator.

3 Future business operation policies

In the Medium-Term Management Plan up until fiscal 2023, we had a slogan of “Catch the Winds of Change. Create New Value” with all directors and employees working as one on key strategies. For our medium-term management policy from fiscal 2024, we have formulated our Medium-Term Vision “Nochu Vision 2030 - Taking on challenges of a changing world as we look to the future -” as the framework that defines our vision for the future.

Furthermore, based on continuation of management that remains focused on soundness, we are working on portfolio improvements and other measures to strengthen medium and long-term profitability.

Financial Review

■ Financial Results for the fiscal year ended March 31, 2024 (Consolidated)

The Norinchukin Bank's ("the Bank") financial results on a consolidated basis as of March 31, 2024 include the results of 22 consolidated subsidiaries and 6 affiliates which are accounted for by the equity method.

The following is a summary of Financial Results for the fiscal year 2023 (for the fiscal year ended March 31, 2024).

• Balance of Assets and Liabilities

Consolidated Total Assets increased by ¥5,299.9 billion from the previous fiscal year-end to ¥99,804.8 billion, and consolidated Total Net Assets decreased by ¥1,233.2 billion from the previous fiscal year-end to ¥4,440.3 billion.

On the assets side, Loans and Bills Discounted increased by ¥185.1 billion to ¥17,599.2 billion, and Securities increased by ¥4,074.5 billion to ¥43,800.2 billion from the previous fiscal year-end, respectively.

On the liabilities side, Deposits decreased by ¥950.7 billion to ¥62,858.6 billion, and Debentures decreased by ¥74.4 billion to ¥379.5 billion from the previous fiscal year-end, respectively.

• Income

Consolidated Ordinary Profits* were ¥134.2 billion, up ¥93.7 billion from the previous fiscal year, and Profit Attributable to Owners of Parent was ¥63.6 billion, up ¥12.6 billion from the previous fiscal year.

* Ordinary Profits represent Ordinary Income less Ordinary Expenses. Ordinary Income represents Total Income less certain special income, and Ordinary Expenses represent Total Expenses less certain special expenses.

• Capital Adequacy Ratio

The Bank's Consolidated Capital Adequacy Ratios (Basel III standard) were as follows: Consolidated Common Equity Tier 1 Capital Ratio 16.43%, Consolidated Tier 1 Capital Ratio 21.18%, and Consolidated Total Capital Ratio 21.23% as of March 31, 2024.

Key Management Indicators (Consolidated)

(Billions of Yen/Millions of U.S. Dollars (Note 1))

Common Equity Tier 1 Capital Ratio (%)	19.49	19.86	17.87	17.82	16.43	16.43
Tier 1 Capital Ratio (%)	23.02	23.19	21.22	21.98	21.18	21.18
Total Capital Ratio (%)	23.02	23.19	21.23	22.03	21.23	21.23

Notes: 1. U.S. dollars have been converted at the rate of ¥151.29 to U.S. \$1, the effective rate of exchange at March 31, 2024.

2. The calculation of the Bank's Consolidated BIS Capital Adequacy Ratio is based on the formula found in Notification No.4 of the Financial Services Agency and the Ministry of Agriculture, Forestry and Fisheries (Standards for Judging the Soundness of Management of the Norinchukin Bank) issued in 2006.

■ Financial Results for the fiscal year ended March 31, 2024 (Non-consolidated)

• Balance of Assets and Liabilities

Total Assets of the Bank at the end of the fiscal year increased by ¥4,991.2 billion to ¥96,416.7 billion from the previous fiscal year-end. Total Net Assets at the end of the fiscal year decreased by ¥1,258.5 billion to ¥4,211.5 billion from the previous fiscal year-end.

On the assets side, Loans and Bills Discounted was ¥16,990.7 billion, and Securities was ¥44,123.1 billion. On the liabilities side, Deposits amounted to ¥62,851.9 billion, and Debentures was ¥379.5 billion.

• Income

Net interest income/loss of the Bank for the fiscal year ended March 31, 2024 was net loss of ¥308.2 billion, down ¥440.6 billion from the previous fiscal year.

The total credit costs were ¥0.2 billion in net losses mainly due to the specific provision of reserve for possible loan losses and others.

As for securities investments, net gains/losses on sales were net gains of ¥655.1 billion, up ¥582.3 billion from the previous fiscal year and the expenses

of provisions and impairments for price-decline of securities and other reasons increased by ¥2.8 billion to ¥2.8 billion from the previous fiscal year.

As a result, with all of the factors mentioned above, the Bank recorded ¥119.5 billion in Ordinary Profits, up ¥96.1 billion and ¥59.9 billion in Net Income, up ¥16.6 billion from the previous fiscal year, respectively. The Bank's net operating losses stood at ¥115.4 billion.

The Bank invests in securities utilizing Money Held in Trust on a large scale. Therefore, the Bank's net operating losses including gains/losses on Money Held in Trust-related transactions, which are substantially the same as investment in securities stood at ¥216.6 billion.

• Capital Adequacy Ratio

The Bank's Non-consolidated Capital Adequacy Ratios (Basel III standard) were as follows: Common Equity Tier 1 Capital Ratio 16.13%, Tier 1 Capital Ratio 20.97%, and Total Capital Ratio 21.02% as of March 31, 2024.

The accompanying notes are an integral part of the financial statements.

Notes to the Consolidated Financial Statements

The Norinchukin Bank and Subsidiaries

1. Basis of Presentation

The consolidated financial statements have been prepared based on the accounting records maintained by The Norinchukin Bank (“the Bank”) and its consolidated subsidiaries in accordance with the provisions set forth in The Norinchukin Bank Act and in conformity with accounting principles and practices generally accepted in Japan, that are different in certain respects from the application and disclosure requirements of International Financial Reporting Standards.

Certain items presented in the consolidated financial statements filed with the Ministry of Agriculture, Forestry and Fisheries of Japan have been reclassified for the convenience of readers.

Amounts in U.S. dollars are included solely for the convenience of readers. The exchange rate of ¥151.29=U.S.\$1, the approximate rate of exchange prevailing on March 31, 2024, has been used for translation purposes. The inclusion of such amounts is not intended to imply that Japanese yen amounts have been, or could be, readily converted, realized or settled in U.S. dollars at the aforementioned rate or at any other rate.

The yen and U.S. dollars figures disclosed in the consolidated financial statements are expressed in millions of yen and millions of U.S. dollars, and have been rounded down. Consequently, differences may exist between the sum of rounded figures and the totals listed in the annual report.

2. Summary of Significant Accounting Policies

(1) Principles of Consolidation

Scope of Consolidation

Subsidiaries

Subsidiaries are, in general, the companies in which the Bank 1) holds, directly and/or indirectly, more than 50% of the voting shares; 2) holds, directly and/or indirectly, 40% or more of the voting shares and, at the same time, exercises effective control over the decision-making body by directing business policy and deciding on financial and operating policies; or 3) holds more than 50% of the voting shares together with those entities that would vote or agree to vote with the Bank due to their close relationship with the Bank through sharing of personnel, provision of finance and technology and other relationships and, at the same time, has effective control over the decision-making body, unless evidence exists which shows that the Bank does not have such control.

The number of subsidiaries as of March 31, 2023 was 23, 21 of which were consolidated and the remaining 2 subsidiaries were unconsolidated. The number of subsidiaries as of March 31, 2024 was 25, 22 of which were consolidated and the remaining 3 subsidiaries were unconsolidated.

The principal consolidated subsidiaries are as follows:

The Norinchukin Trust & Banking Co., Ltd.
Kyodo Housing Loan Co., Ltd.
Norinchukin Bank Europe N.V.

Newly established “Norinchukin Capital Strategic Co-Creation Fund I Investment Limited Partnership” was consolidated from the fiscal year ended March 31, 2024.

The principal unconsolidated subsidiary is as follows:

NORINCHUKIN INNOVATION FUND L.P.

The unconsolidated subsidiaries were excluded from the scope of consolidation, since its impact on the consolidated financial statements was not so material as to hinder a rational judgement of the financial position and results of operations in terms of Total Assets, Ordinary Income, Net Income, Retained Earnings and Accumulated Other Comprehensive Income.

There were two companies that were not subsidiaries although the Group owns more than 50% voting rights on its own account as of March 31, 2024.

The principal company is as follows:

Yamamoto Suisan Yusou Co., Ltd.

These companies were not subsidiaries because the objective of the Group to own the voting rights is only to earn capital gains through fostering new businesses and business revitalization and the investments meet the requirements prescribed in Paragraph 16 of “Implementation Guidance on Determining a Subsidiary and an Affiliate” (The Accounting Standards Board of Japan (ASBJ) Guidance No.22).

The dates of the fiscal year-end of all consolidated subsidiaries are as follows:

Closing date: December 31, 2023	Number of subsidiaries: 10
Closing date: March 31, 2024	Number of subsidiaries: 12

The necessary adjustments have been made to the financial statements for any significant transactions that took place between their respective closing dates and the date of the consolidated financial statements.

Affiliates

Affiliates are, in general, the companies, other than subsidiaries, in which the Bank 1) holds, directly and/or indirectly, 20% or more of the voting shares; 2) holds, directly and/or indirectly, 15% or more of the voting shares and also is able to influence the decision-making body through sharing of personnel, provision of finance and technology, and other relationships; or 3) holds more than 20% of the voting shares together with those entities that would vote or agree to vote with the Bank due to their close relationship with the Bank through sharing of personnel, provision of finance and technology and other relationships and, at the same time, is able to influence the decision-making body in a material degree, unless evidence exists which shows that the Bank does not have such influence.

The numbers of affiliates as of March 31, 2024 and 2023 were 6 and 6, respectively, all of which were accounted for by the equity method. Differences between the cost and the underlying net equity at fair value of investments in companies which are accounted for by the equity method have been amortized by the straight-line method over 20 years except for immaterial goodwill which are charged to income in the year of acquisition. Negative goodwill is credited to income in the year of acquisition. The principal affiliate accounted for by the equity method is as follows:

JA MITSUI LEASING, LTD.

(2) Transactions for Trading Purposes

Transactions for trading purposes are those seeking gains arising from short-term market movements or from the arbitrage opportunities in interest rates, foreign exchange rates and other market related indices. Such transactions are reported as Trading Assets or Trading Liabilities in the consolidated balance sheet on a trade date basis.

Gains and losses arising from transactions for trading purposes are recorded in Trading Income and Trading Expenses on the consolidated statement of operations.

Securities, monetary claims and certain other instruments held for trading purposes are valued at fair value prevailing at the end of the period. Derivatives held for trading purposes, such as swaps, futures and options, are valued on the assumption that they were settled at the end of the period.

Trading Income and Trading Expenses include interest received and paid in the fiscal year, gains or losses resulting from any change in the fair value of securities and monetary claims from the end of the previous fiscal year and gains or losses of derivatives resulting from any change in the fair value, which is determined assuming they were settled at the end of the fiscal year, from the end of the previous fiscal year.

Derivatives are measured at fair value based on net assets or liabilities after offsetting financial assets and financial liabilities with respect to specific market risk or specific credit risk.

(3) Financial Instruments

a. Securities

Held-to-maturity debt securities are valued at amortized cost (straight-line method), as determined by the moving average method.

Other securities are valued at fair value (the cost of securities sold is calculated by the moving average method). Stocks and others which are no market prices ("Stocks and others with no market prices") are valued at cost determined by the moving average method.

Net Unrealized Gains or Losses on Other Securities, net of taxes, are reported separately in Net Assets.

Securities included in Money Held in Trust are valued using the same methods described in (2) and (3) a. above.

b. Derivatives

Derivative transactions (other than transactions for trading purposes) are recorded at fair value.

The fair value of Derivatives is calculated based on net assets or liabilities after offsetting financial assets and financial liabilities with respect to specific market risk or specific credit risk.

c. Hedge Accounting

(a) Hedge of Interest Rate Risk

The Bank applies the deferral method of hedge accounting to the hedge transactions to manage interest rate risk associated with various financial assets and liabilities, which is described in “Accounting and Auditing Treatment relating to the Adoption of ‘Accounting for Financial Instruments’ for Banks,” issued by the Japanese Institute of Certified Public Accountants (“JICPA”), (JICPA Industry Committee Practical Guideline No. 24, issued on March 17, 2022). Hedge effectiveness of a fair value hedge is assessed by identified groups of hedged items, such as loans and deposits, and the corresponding groups of hedging instruments, such as interest rate swaps within the same maturity bucket. Hedge effectiveness of a cash flow hedge is assessed based on the correlation of the interest rate risk indicators of the hedged items and that of the hedging instruments.

(b) Hedge of Foreign Exchange Rate Risk

The Bank applies the deferral method of hedge accounting to the hedge transactions to manage foreign exchange rate risk arising from various financial assets and liabilities denominated in foreign currencies, which is described in “Accounting and Auditing Treatment relating to Accounting for Foreign Currency Transactions in the Banking Industry” (JICPA Industry Committee Practical Guideline No. 25, issued on October 8, 2020). Hedge effectiveness is assessed by reviewing whether the amount of the hedged items, such as financial monetary assets and liabilities denominated in foreign currencies, exceeds that of the hedging instruments, such as currency swap or foreign exchange swap transactions, entered into to mitigate the foreign exchange rate risk arising from the hedged items.

The deferral method or the fair value method of hedge accounting is applied to the portfolio hedges of foreign exchange rate risks associated with securities denominated in foreign currencies (other than debt securities), provided that (1) the securities denominated in foreign currencies are identified as hedged items in advance, and (2) foreign currency amounts of spot and forward liabilities exceed those of the acquisition costs of the foreign currency securities designated as hedged items.

(c) Internal Derivative Transactions

Internal derivative transactions between trading accounts and banking accounts or inter-division transactions, which are designated as hedges, are not eliminated. The related gains and losses are recognized in the consolidated statement of operations or are deferred in the consolidated balance sheet in accordance with the hedge accounting rules, because the internal interest rate swap and currency swap transactions, that are designated as hedging instruments, are traded in a non-discretionary manner and are appropriately and ultimately covered by third party transactions, which are conducted in accordance with the standards stipulated in the JICPA Industry Committee Practical Guideline No.24 and No.25.

For certain other assets or liabilities, the Bank applies the deferral method or the accrual method of hedge accounting, as specifically permitted for certain interest rate swaps. Under the deferral method, the recognition of income or expenses associated with a hedging instrument is deferred to the period when the income or expense arising from the hedged item is recognized.

(d) Hedges Applied to “the Treatment of Hedge Accounting for Financial Instruments that Reference LIBOR”

As for Hedges mentioned above, all of hedges under “the Treatment of Hedge Accounting for Financial Instruments that Reference LIBOR” (ASBJ PITF No.40 for Practical Solution, issued on March 17, 2022) are applied to the specific treatments designated by the PITF. Hedges applied to the PITF are as follows.

- I Hedge Methods: The Deferral Method or The Accrual Method specifically permitted for certain interest rate swap
 - Hedge Instruments: Interest rate swaps
 - Hedged Items: Loans and Bill Discounted, Securities (Bonds) and others
 - Type of Hedge Transactions: Offsetting market movements
- II Hedge Method: The Deferral Method
 - Hedge Instruments: Interest rate swaps
 - Hedged Items: Payables under Repurchase Agreements and others
 - Type of Hedge Transactions: Fixing cash flows
- III Hedge Method: The Deferral Method
 - Hedge Instruments: Currency swaps
 - Hedged Items: Financial monetary assets and liabilities denominated in foreign currencies and others
 - Type of Hedge Transactions: Offsetting market movements

(4) Tangible Fixed Assets (other than Lease Assets)**a. Depreciation**

Depreciation of Tangible Fixed Assets of the Bank is calculated using the declining-balance method. However, depreciation on buildings acquired on or after April 1, 1998 (excluding buildings and accompanying facilities) and buildings and accompanying facilities and structures acquired on or after April 1, 2016 are calculated using the straight-line method.

The useful lives of major Tangible Fixed Assets are as follows:

Buildings: 15 years to 50 years

Others: 5 years to 15 years

Depreciation of Tangible Fixed Assets of the consolidated subsidiaries is primarily calculated using the declining-balance method over their estimated economic useful lives.

b. Land Revaluation

In accordance with the Law Concerning the Revaluation of Land, effective as of March 31, 1998, land used for business purposes was revaluated on March 31, 1998. Unrealized gains arising from revaluation, net of deferred tax, are disclosed as Revaluation Reserve for Land and included in Net Assets on the consolidated balance sheet. The related deferred tax assets or deferred tax liabilities are recorded as Deferred Tax Assets for Land Revaluation or Deferred Tax Liabilities for Land Revaluation.

The land prices used for the revaluation were reasonably calculated based on third-party appraisals in accordance with Article 2-5 of the enforcement ordinance for the Law Concerning the Revaluation of Land.

(5) Intangible Fixed Assets (other than Lease Assets)

Depreciation of Intangible Fixed Assets is calculated using the straight-line method.

The costs of software developed or obtained for internal use are capitalized and amortized over an estimated useful life of 5 years.

(6) Lease Assets

Depreciation of Lease Assets in Tangible Fixed Assets and Intangible Fixed Assets which are finance leases where the ownership of assets is not transferred to the lessees is calculated using the straight-line method over the lease term with zero residual value unless residual value is guaranteed by the corresponding lease contracts.

(7) Foreign Currency Translation

Assets and liabilities denominated in foreign currencies, and accounts of overseas branches are translated into Japanese yen primarily using the exchange rates in effect at the consolidated balance sheet date.

Assets and liabilities of the consolidated subsidiaries denominated in foreign currencies are translated into Japanese yen using the respective exchange rates in effect at the balance sheet date.

(8) Reserve for Possible Loan Losses

Reserve for Possible Loan Losses of the Bank is computed as follows:

- a. Reserve for loans to debtors who are legally bankrupt under the Bankruptcy Law, Special Liquidation under Company Law or other similar laws ("debtors in bankruptcy") or debtors who are substantially bankrupt under those laws ("debtors in default") is provided based on the remaining book value of the loans after the direct write-off described below and the deduction of the amount expected to be collected through the disposals of collateral or the execution of guarantees.

With respect to loans to borrowers who are legally or substantially bankrupt and that are secured by collateral or guarantees, the remaining book value of the loan, after the deduction of the amount of collateral or the execution of guarantees, is directly written off. Direct write-offs were ¥9,227 million (\$60 million) and ¥8,554 million for the fiscal years ended March 31, 2024 and 2023, respectively.

- b. Reserve for loans to debtors who are not currently bankrupt, but are likely to become bankrupt ("doubtful debtors"), is determined after taking into account a comprehensively evaluated repayment ability of debtors after deducting the amount expected to be collected through the disposal of collateral or the execution of guarantees.

- c. Reserve for loans to debtors with restructured loans (“debtors under requirement of control”) (see Note 6) and other debtors requiring close monitoring going forward (“other substandard debtors”) is provided based on the Discounted Cash Flow method if the loan balance exceeds a specific amount and the future cash flows of the principal and interest of the loan can be reasonably estimated. Under the Discounted Cash Flow method, reserve is measured as the difference between the book value of the loan and its present value of expected future cash flows, discounted primarily by the contractual interest rate before the terms of the loan were restructured.
- d. Reserve for loans to “debtors under requirement of control” other than those indicated above, the Bank principally estimates expected losses for the next 3 years. Whereas “other substandard debtors” and debtors who maintain favorable operating conditions and who have no particular financial difficulties (“standard”), the Bank estimates expected losses for the next year. The expected losses are calculated by long-term averages of the historical loan-loss ratios based on past 1-or 3-year loan-loss experience and further adjusted for the risks identified based on future forecasts. Specifically, the reserve for possible loans losses is recorded, taking into account the current position in economic cycles and the likelihood of each scenario in light of future outlook, by referring to historical loan losses, based on the macroeconomic indicators (Indexes of Business Conditions (Composite Index (Coincident Index))) which are highly correlated to historical records of loan losses and the Bank’s outlook for economic fluctuations. The future forecasts are approved by directors after consultation with a committee composed of management (the Risk Management Committee).
- e. Specific reserve for loans to certain countries with financial difficulties is provided based on the expected amount of losses taking into account the political, economic and other conditions in each country.

All claims are assessed by the Business Units based on the Bank’s internal rules for the self-assessment of asset quality. The Asset Audit Department, which is independent from the Business Units, audits these self-assessments. Reserves described above are determined based on the results of these self-assessments.

Reserve for Possible Loan Losses for receivables of the Bank’s consolidated subsidiaries is provided at the amount determined as necessary using the past default ratio. Reserve for Possible Loan Losses for problem receivables of the Bank’s consolidated subsidiaries is provided by taking into account their recoverability and an estimate of uncollectible amount.

(9) Reserve for Possible Investment Losses

Reserve for Possible Investment Losses represents an amount determined to be necessary to cover the estimated loss from the investments, taking into account the financial condition and other factors of the issuer of the securities. There were no Reserve for Possible Investment Losses recorded as of March 31, 2024.

(10) Reserve for Bonus Payments

Reserve for Bonus Payments represents estimated cost of payment of employees’ bonuses attributable to the period.

(11) Reserve for Directors’ Retirement Benefits

Reserve for Directors’ Retirement Benefits for the payments of retirement benefits for directors (including Executive Officers) and corporate auditors is recognized as the required amount accrued at the end of the period.

(12) Accounting Method for Retirement Benefits

In calculating retirement benefit obligations, the benefit formula basis is used for attributing expected retirement benefits to the period up to the end of this fiscal year.

Unrecognized prior service cost is amortized over a certain period (10 years) within the employees’ average remaining service period using the straight-line method beginning in the fiscal year in which the difference has arisen.

Unrecognized actuarial differences are amortized over a certain period (10 years) within the employees’ average remaining service period using the declining-balance method beginning in the fiscal year after the difference has arisen.

Some of the Bank’s consolidated subsidiaries, in calculating Net Defined Benefit Liability and retirement benefit cost, adopt the simplified method whereby the retirement benefit obligations are calculated at an amount that would be paid if all eligible employees voluntarily retired at the consolidated balance sheet date.

(13) Scope of “Cash and Cash Equivalents” in the Consolidated Statement of Cash Flows

“Cash and Cash Equivalents” in the consolidated statement of cash flows represents cash, non-interest bearing due from banks and due from the Bank of Japan in Cash and Due from Banks on the consolidated balance sheet.

(14) Profit Attributable to Owners of Parent per Share

Profit Attributable to Owners of Parent per Share is computed based upon the weighted average number of shares outstanding during the period.

The number of lower dividend rate stocks is deducted from the denominator in the calculation of Profit Attributable to Owners of Parent per Share.

(15) Accounting Principles and Procedures When Related Accounting Standards Are Not Clear

Profit and losses on cancellation of Investment Trust are accounted in “Interest and Dividends on Securities” on Profit and Loss Statement.

(16) Significant Accounting Estimates

Items for which the amount was recorded in the consolidated financial statements for this fiscal year due to accounting estimates and which may have a significant impact on the consolidated financial statements for the following consolidated fiscal year are as follows:

a. Reserve for Possible Loan Losses

(a). Reserve for Possible Loan Losses on the consolidated financial statements were ¥125,424 million (\$829 million) and ¥131,441 million for the fiscal years ended March 31, 2024 and 2023, respectively.

(b). Information relating the content of significant accounting estimates for identified items

I. Calculation methods

The Bank’s Reserve for Possible Loan Losses is calculated based on the determination of the debtor classification (“standard,” “other substandard debtors,” “debtors under requirement of control,” “doubtful,” “debtors in default,” “debtors in bankruptcy”) based on each debtor’s future debt repayment capacity through asset assessments, as well as a certain calculation method according to debtor classification, as stated in (8) Reserve for Possible Loan Losses.

The Bank reflects the risks identified based on future forecasts in calculating Reserve for Possible Loan Losses of “standard,” “other substandard debtors” and “debtors under requirement of control” in order to maintain stable lending to other institutions regardless of economic fluctuations caused by various risks.

II. Key assumptions

The debtor’s future forecasts including its expected business performance are the key assumptions in determining the debtor classification.

In forecasting the future when calculating Reserve for Possible Loan Losses of “standard,” “other substandard debtors,” “debtors under requirement of control,” the likelihood of each scenario based upon current position in economic cycles and an outlook for future is a key assumption.

The Bank estimates the current position in the economic cycles as a period of expansion in the fiscal year. As for the future outlook, the main scenario is the continuation of a moderate economic recovery. In addition, the assumptions partially reflect the economic recession scenario, mainly due to the rapid slowdown of overseas economies resulting from the materialization of the effect of tightening monetary policy, the long-term slump in consumption due to sluggish real wage growth in Japan, and further worsening geopolitical risks.

III. Impact on the consolidated financial statements for the following fiscal year

Changes in the assumptions used in the estimates due to changes in the performance of debtors and in economic conditions, such as slowdown of overseas economies, geopolitical risks, could have a significant impact on Reserve for Possible Loan Losses in the following fiscal year.

b. Deferred Tax Assets

(a). Deferred Tax Assets after offsetting Deferred Tax Liabilities on the consolidated financial statements were ¥3,731 million (\$24 million) and ¥307,942 million as of March 31, 2024 and 2023, respectively. Deferred Tax Assets before offsetting Deferred Tax Liabilities on the consolidated financial statements were ¥9,513 million (\$62 million) and ¥325,899 million as of March 31, 2024 and 2023, respectively.

(b). Information relating the content of significant accounting estimates for identified items

I. Calculation methods

The Bank recognizes Deferred Tax Assets for deductible temporary differences that are deemed to have the effect of reducing the tax burden in the future (i.e., recoverability). In determining the recoverability of deferred tax assets, the Bank recognizes Deferred Tax Assets based on the estimates such as the classification of an entity and the future taxable income as well as the scheduling of deductible temporary differences, in accordance with Implementation Guidance on Recoverability of Deferred Tax Assets (ASBJ Guidance No. 26).

In determining the classification of an entity, the Bank considers the estimates of future taxable income based on the situation where financing costs, such as funding costs in foreign currencies, have increased as a result of the interest rate hikes, mainly in Europe and the United States, as well as the trends of the past and current period taxable income.

II. Key assumptions

The estimation of future taxable income is based on medium-to-long term earnings prospects adjusted by the future uncertainty, considering various simulations and other factors. The key assumptions are the forecasts of future financial and economic environment such as market fluctuations of interest rates and foreign exchange rates, and the trends of the financial position by the Bank's portfolio management in response to such forecasts.

III. Impact on the consolidated financial statements for the following fiscal year

If the assumptions used in the Bank's estimates change due to the fluctuation in financial economic environment or the change in the financial position by the Bank's portfolio management, the change could have a significant impact on Deferred Tax Assets in the following fiscal year.

c. Fair Value of Foreign Bonds for which the Bank cannot Obtain Quoted Market Prices

(a). Amounts accounted on consolidated financial statements are as follows.

As of March 31, 2024

Items	Millions of Yen		Millions of U.S. Dollars	
	Consolidated Balance Sheet Amount	Fair Value	Consolidated Balance Sheet Amount	Fair Value
Foreign Bonds				
Other securities	¥ 929,295	¥ 929,295	\$ 6,142	\$ 6,142
Held-to-Maturity Debt Securities	8,889,674	8,919,620	58,759	58,957
Total	¥9,818,969	¥9,848,915	\$64,901	\$65,099

As of March 31, 2023

Items	Millions of Yen	
	Consolidated Balance Sheet Amount	Fair Value
Foreign Bonds		
Other securities	¥ 29,486	¥ 29,486
Held-to-Maturity Debt Securities	7,668,102	7,590,166
Total	¥7,697,588	¥7,619,652

(b). Information relating the content of significant accounting estimates for identified items

I. Calculation methods

As for fair value of foreign bonds for which the Bank cannot obtain quoted market prices, the Bank and its subsidiaries generally estimate fair values by using prices obtained from independent pricing vendors, or by using valuation technique such as Discount Cash Flow method. As for calculating the fair value, the Bank has adopted the valuation model which reflects the nature, characteristics, and risks of each financial instrument and has mainly used observable inputs. Additionally, the Bank uses inputs such as default rates, recovery rates, prepayment rates and discount rates, to calculate the fair value.

Where the Bank adopts the valuation obtained from the third party, it verifies the validity of the valuation with appropriate methods such as confirmation of valuation models and inputs, comparison with the fair values for similar financial instruments.

II. Key Assumptions

In terms of verifying the validity of valuation obtained from the third party and calculating the fair value based on the Bank's estimates, key assumptions are default rates, recovery rates, prepayment rates and discount rates according to characteristics in asset classes. As for calculating discount rates, the Bank has considered benchmark interest rates and transactions for similar financial instruments.

III. Impact on the consolidated financial statements in the following fiscal year

If the assumption used in the Bank's estimates changes due to the fluctuation in financial economic environment, the change could have a significant impact on the fair values in the following fiscal year.

3. Trading Assets

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Trading Securities	¥ 31	¥ 20	\$ 0
Derivatives of Securities Related to Trading Transactions	—	0	—
Trading-related Financial Derivatives	4,453	3,613	29
Total	¥4,484	¥3,635	\$29

4. Securities

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Japanese Government Bonds	¥ 7,757,494	¥ 6,933,134	\$ 51,275
Municipal Government Bonds	142,947	149,682	944
Corporate Bonds	796,027	1,049,380	5,261
Stocks	759,474	810,962	5,019

Notes: 1. The above amount is based on the consolidated balance sheet amount at the end of the fiscal year.

2. Investment Trusts include Japanese trusts and foreign trusts.

5. Loans and Bills Discounted

As of March 31	Millions of Yen		Millions of U.S. Dollars
	2024	2023	2024
Loans on Deeds	¥15,768,344	¥15,592,060	\$104,225
Loans on Bills	534,012	486,753	3,529
Overdrafts	1,295,014	1,333,797	8,559
Bills Discounted	1,886	1,492	12
Total	¥17,599,257	¥17,414,105	\$116,327

6. Non Performing Loans Based on the Norinchukin Bank Act and the Financial Reconstruction Law

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Bankrupt and Quasi-Bankrupt Assets	¥ 1,732	¥ 5,312	\$ 11
Doubtful Assets	70,537	60,990	466
Loans Past Due for Three Months or More	635	515	4
Restructured Loans	20,457	28,352	135
Total	¥93,363	¥95,172	\$617

Notes: 1. These assets consist of those included in the accounts of bonds included in "Securities" (its principal's redemption and interest payments are guaranteed, in whole or in part, and the corporate bonds issue is limited to a private placement of the securities (Article 2, Paragraph 3 of the Financial Instruments and Exchange Act.)), "Loans", "Foreign Exchanges Assets", accrued interest income and suspense payment in "Other assets" and "Customers' Liabilities for Acceptances and Guarantees" on the consolidated balance sheet, and securities in the notes (Limited to those under a loan for use or lending agreement.) that are in case of loan.

2. Bankrupt and Quasi-Bankrupt Assets are credits against debtors in bankruptcy due to the commencement of bankruptcy proceedings, the commencement of corporate reorganization proceedings, and the petition of rehabilitation proceedings, as well as credits of a similar nature.

3. Doubtful Assets are credits that the debtor is not yet in a state of bankruptcy, but its financial position and business performance have deteriorated, and it is highly probable that principal's collection and interest on credits in accordance with the terms of the contract will not be received. These credits do not fall under the category of Bankrupt and Quasi-Bankrupt Assets.

4. Loans Past Due for Three Months or More are loans on which payments of principal and/or interest have not been made for a period of three months or more since the next day following the first due date, and which are not included in Bankrupt and Quasi-Bankrupt Assets, or Doubtful Assets.

5. Restructured loans are loans whereby its terms are modified in favor of the borrowers by reducing the interest rate, deferral of payments of interest or principal, waiving principal repayments, etc., in order to support the borrowers' rehabilitation and facilitate the collection of the loans, and which are not included in Bankrupt and Quasi-Bankrupt Assets, Doubtful Assets or Loans Past Due for Three Months or More.

7. Foreign Exchange Assets

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Due from Foreign Banks	¥281,371	¥584,996	\$1,859
Total	¥281,371	¥584,996	\$1,859

8. Other Assets

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Prepaid Expenses	¥ 2,189	¥ 2,365	\$ 14
Accrued Income	276,432	186,636	1,827
Derivatives other than for Trading	173,223	280,528	1,144

Other	6,783	6,552	44
Total Net Book Value	129,549	134,914	856
Accumulated Depreciation Deducted	¥ 87,343	¥ 84,817	\$577

Intangible Fixed Assets

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Software	¥27,552	¥28,514	\$182
Lease Assets	6,959	7,196	46
Other	19,716	15,958	130
Total	¥54,228	¥51,669	\$358

10. Assets Pledged

Assets pledged as collateral comprise the following:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Securities	¥14,143,678	¥11,244,349	\$93,487
Loans and Bills Discounted	1,684,362	1,473,284	11,133

Liabilities secured by the above assets are as follows:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Payables under Repurchase Agreements	¥12,942,102	¥10,353,399	\$85,544
Borrowed Money	2,330,962	1,754,279	15,407

In addition, as of March 31, 2024 and 2023, Securities (including transactions of Money Held in Trust) of ¥13,351,390 million (\$88,250 million) and ¥10,960,100 million, respectively, and Foreign Exchange Assets (including transactions of Money Held in Trust) of ¥34,304 million (\$226 million) and ¥28,801 million, respectively, were pledged as collateral for settlement of exchange and derivative transactions or as margins of futures transactions.

As of March 31, 2024 and 2023, initial margins of futures markets of ¥112,022 million (\$740 million) and ¥119,438 million, respectively, cash collateral paid for financial instruments of ¥1,351,725 million (\$8,934 million) and ¥155,671 million, respectively, other cash collateral paid of ¥586,385 million (\$3,875 million) and ¥616,020 million, respectively, and guarantee deposits of ¥5,760 million (\$38 million) and ¥5,218 million, respectively, were included in Other Assets.

11. Deposits

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Time Deposits	¥52,507,758	¥54,140,903	\$347,066
Deposits at Notice	5,823	8,708	38
Ordinary Deposits	4,446,200	4,784,825	29,388
Current Deposits	70,082	65,223	463
Other Deposits	5,828,791	4,809,788	38,527
Total	¥62,858,656	¥63,809,449	\$415,484

12. Debentures

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Long-term Coupon Debentures	¥379,548	¥454,034	\$2,508
Total	¥379,548	¥454,034	\$2,508

13. Trading Liabilities

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Derivatives of Securities Related to Trading Transactions	¥ —	¥ 1	\$—
Trading-related Financial Derivatives	3,429	2,784	22
Total	¥3,429	¥2,786	\$22

14. Borrowed Money

Borrowed Money includes subordinated borrowings of ¥1,316,972 million (\$8,704 million) and ¥1,316,972 million as of March 31, 2024 and 2023, respectively, which have a special agreement that requires the fulfillment of the payment obligations of such borrowing to be subordinated to other general liabilities.

15. Foreign Exchange Liabilities

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Foreign Bills Payable	¥—	¥28	\$—
Total	¥—	¥28	\$—

16. Other Liabilities

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Accrued Expenses	¥ 112,116	¥ 86,500	\$ 741
Income Taxes Payable	23,566	7,971	155
Unearned Income	1,957	1,077	12
Derivatives other than for Trading	1,255,894	524,345	8,301
Accounts Payable for Securities Purchased	3,495,552	2,312,011	23,104
Other	188,534	330,846	1,246
Total	¥5,077,622	¥3,262,753	\$33,562

17. Retirement Benefit Plans

(1) Outline of the Adopted Retirement Benefit Plans

The Bank has a point based plan on which points are granted according to years of employees' service etc. The Bank has a defined benefit pension plan (funded) and, in addition, has a lump-sum payment pension plan (originally unfunded, but establishing a retirement benefit trust makes this plan funded). On the defined benefit pension plan, a lump-sum payment or pension is granted based on employees' salary and length of service. On the lump-sum payment pension plan, a lump-sum payment is granted based on employees' salary and length of service. Additional retirement benefits are paid to employees in certain cases.

The Bank revised its Retirement Benefit Plans and transferred part of defined benefit pension plans to defined contribution pension plans in the year ended March 31, 2024. Some of the Bank's consolidated subsidiaries adopt lump-sum payment pension plans, defined benefit pension plans and defined contribution pension plans.

Some of the Bank's consolidated subsidiaries, in calculating Net Defined Benefit Liability and retirement benefit cost, adopt the simplified method whereby retirement benefit obligations are calculated at an amount that would be paid if all eligible employees voluntarily retired at the consolidated balance sheet date.

(2) Defined Benefit Plan

a. The changes in the retirement benefit obligations for the years ended March 31, 2024 and 2023, except for the plans accounted for by the simplified method, are as follows:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Balance at the Beginning of the Fiscal Year	¥130,171	¥144,567	\$860
Service Cost	3,609	4,623	23
Interest Cost	1,091	436	7
Actuarial Differences	380	(13,190)	2
Retirement Benefit Paid	(5,413)	(5,517)	(35)
Prior Service Cost	—	(746)	—
Decrease resulting from transfer to defined contribution pension plans	(7,389)	—	(48)
Other	(57)	—	(0)
Balance at the End of the Fiscal Year	¥122,393	¥130,171	\$809

b. The changes in plan assets for the years ended March 31, 2024 and 2023, except for the plans accounted for by the simplified method, are as follows:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Balance at the Beginning of the Fiscal Year	¥250,677	¥243,954	\$1,656
Expected Return on Plan Assets	2,600	2,831	17
Actuarial Differences	34,019	4,764	224
Contributions by the Bank	1,482	1,765	9
Retirement Benefit Paid	(2,774)	(2,639)	(18)
Cancellation of retirement benefit trusts	(115,851)	—	(765)
Decrease resulting from transfer to defined contribution pension plans	(7,389)	—	(48)
Balance at the End of the Fiscal Year	¥162,766	¥250,677	\$1,075

c. The changes in Net Defined Benefit Liability of the plans accounted for by the simplified method for the years ended March 31, 2024 and 2023 are as follows:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Balance at the Beginning of the Fiscal Year	¥1,275	¥1,216	\$ 8
Retirement Benefit Expense	333	348	2
Retirement Benefit Paid	(253)	(270)	(1)
Contributions to the Plans	(31)	(19)	(0)
Balance at the End of the Fiscal Year	¥1,323	¥1,275	\$ 8

d. The following table sets forth the funded status of the plans and the amounts recognized in the Consolidated Balance Sheet as of March 31, 2024 and 2023 for the Bank's and the consolidated subsidiaries' defined benefit plans:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Funded Retirement Benefit Obligations	¥ 123,467	¥ 131,202	\$ 816
Plan Assets at Fair Value	(163,462)	(251,350)	(1,080)
	(39,995)	(120,148)	(264)
Unfunded Retirement Benefit Obligations	945	917	6
Net Amount of Liabilities and Assets Recorded in the Consolidated Balance Sheet	(39,049)	(119,231)	(258)
Net Defined Benefit Liability	2,407	10,234	15
Net Defined Benefit Asset	41,456	129,465	274
Net Amount of Liabilities and Assets Recorded in the Consolidated Balance Sheet	¥ (39,049)	¥(119,231)	\$ (258)

Note: The above table includes the plans accounted for by the simplified method.

e. The components of retirement benefit expense are as follows:

	Millions of Yen		Millions of U.S. Dollars
For the fiscal years ended March 31	2024	2023	2024
Service Cost	¥ 3,552	¥ 4,623	\$ 23
Interest Cost	1,091	436	7
Expected Return on Plan Assets	(2,600)	(2,831)	(17)
Amortization of Actuarial Differences	(7,512)	(11,935)	(49)
Amortization of Prior Service Cost	(68)	—	(0)
Retirement Benefit Expense by the Simplified Method	333	348	2
Other	730	738	4
Retirement Benefit Expense on Defined Benefit Plan	¥ (4,473)	¥ (8,621)	\$ (29)
Gains on cancellation of retirement benefit trusts (*1)	¥(46,922)	¥ —	\$ (310)
Gains on revision of retirement benefit plan (*2)	¥ (525)	¥ —	\$ (3)

(*1) "Gains on cancellation of retirement benefit trusts" are recorded in "Extraordinary Profits".

(*2) "Gains on revision of retirement benefit plan" are recorded in "Extraordinary Profits".

f. Effect of Remeasurements of Defined Benefit Plans on Consolidated Statement of Comprehensive Income

The components of Remeasurements of Defined Benefit Plans recognized on the Consolidated Statement of Comprehensive Income (before tax effect) are as follows:

	Millions of Yen		Millions of U.S. Dollars
For the fiscal years ended March 31	2024	2023	2024
Prior Service Cost	¥ (130)	¥ 746	\$ (0)
Actuarial Differences	(21,259)	6,022	(140)
Total	¥(21,390)	¥6,769	\$(141)

g. Effect of Remeasurements of Defined Benefit Plans on Consolidated Balance Sheet

The components of Remeasurements of Defined Benefit Plans recognized on the Consolidated Balance Sheet (before tax effect) are as follows:

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Unrecognized Prior Service Cost	¥ 615	¥ 746	\$ 4
Unrecognized Actuarial Differences	42,685	63,944	282
Total	¥43,301	¥64,691	\$286

h. Particulars of Plan Assets

(a) The fair value of Plan Assets, by major category, as a percentage of total Plan Assets are as follows:

As of March 31	2024	2023
Bonds	22%	14%
Stocks	68%	79%
Insurance Assets (General Account)	9%	6%
Other	1%	1%
Total	100%	100%

(b) Method for estimating the expected rates of return on Plan Assets

The expected rates of return on Plan Assets have been estimated based on the current and anticipated allocation to each asset class and the current and expected long-term returns on assets held in each category of Plan Assets.

i. The Assumptions Used in Accounting for the Above Plan

The major assumptions used in accounting for the above plan are as follows:

As of or for the fiscal years ended March 31	2024	2023
Discount Rate	0.9%	0.9%
Expected Rates of Increase in Salary	1.1-3.9%	2.0-3.9%
Expected Rates of Return on Plan Assets	0-3.0%	0-3.0%

(3) Defined Contribution Pension Plans

Contributions by the Bank's consolidated subsidiaries to the defined contribution pension plans were ¥756 million (\$5 million) and ¥272 million as of March 31, 2024 and 2023, respectively.

18. Accounting for Income Taxes

Components of deferred tax assets and liabilities are as follows:

As of March 31	Millions of Yen		Millions of U.S. Dollars
	2024	2023	2024
Deferred Tax Assets:			
Reserve for Possible Loan Losses	¥ 12,126	¥ 16,123	\$ 80
Write-off of Loans	1,115	1,030	7
Losses on Revaluation of Securities	20,933	15,524	138
Net Defined Benefit Liability	4,957	5,758	32
Depreciation Expense	511	519	3
Net Operating Losses Carried Forward	801	1,401	5
Unrealized Losses on Other Securities	492,064	263,269	3,252
Deferred Losses on Hedging Instruments	39,381	8,038	260
Unrealized Losses on Reclassification	2,529	2,504	16
Conversion of Investment Form of Securities	30,500	47,693	201
Other	119,525	105,997	790
Subtotal	724,447	467,861	4,788
Valuation Allowance (*)	(624,860)	(73,365)	(4,130)
Total Deferred Tax Assets	99,586	394,495	658
Deferred Tax Liabilities:			
Gains from Contribution of Securities to Employee Retirement Benefit Trust	—	(4,968)	—
Net Defined Benefit Asset	(41,431)	(27,719)	(273)
Unrealized Gains on Other Securities	(57)	(35)	(0)
Deferred Gains on Hedging Instruments	(36,673)	(37,513)	(242)
Unrealized Gains on Reclassification	—	(3)	—
Conversion of Investment Form of Securities	(280)	(271)	(1)
Reserves for Tax Basis Adjustments of Fixed Assets	(10,171)	(11,355)	(67)
Other	(13,569)	(4,684)	(89)
Total Deferred Tax Liabilities	(102,184)	(86,552)	(675)
Net Deferred Tax Liabilities	¥ (2,597)	¥ 307,942	\$ (17)

(*) The Valuation Allowance increased by ¥551,494 million (\$3,645 million) for the fiscal year ended March 31, 2024. This increase is resulted from the additional recognition of valuation allowance related to Unrealized Losses on Other Securities.

19. Acceptances and Guarantees

As of March 31	Millions of Yen		Millions of U.S. Dollars
	2024	2023	2024
Guarantees	¥3,258,947	¥3,197,577	\$21,541
Total	¥3,258,947	¥3,197,577	\$21,541

All contingent liabilities arising in connection with customers' foreign trade and other transactions are classified under Acceptances and Guarantees. As a contra account, Customers' Liabilities for Acceptances and Guarantees, is classified as an asset representing the Bank's right of indemnity from customers.

20. Commitments to Overdrafts and Loans

Commitments related to overdrafts and loans represent agreements to extend overdrafts or loans up to the pre-agreed amount at the customer's request as long as no violation of the conditions stipulated in the commitment agreement exists. The amounts of undrawn commitments in relation to such agreements were ¥4,886,891 million (\$32,301 million) and ¥4,620,214 million as of March 31, 2024 and 2023, respectively. The amounts of the undrawn commitments, which the Bank and its consolidated subsidiaries could cancel at any time without cause, were ¥2,918,650 million (\$19,291 million) and ¥2,719,434 million as of March 31, 2024 and 2023, respectively.

The amount of undrawn commitments does not necessarily affect the future cash flow of the Bank and its consolidated subsidiaries because the majority of such agreements are terminated without being exercised. Most of these agreements have provisions which stipulate that the Bank and its consolidated subsidiaries may not extend the loan or may decrease the commitment when there are certain changes in the overall financial conditions, certain issues relating to collateral and other reasons. At the time of extending loans to customers, the Bank and its consolidated subsidiaries are able to request collateral in the form of premises or securities as necessary. After extending loans, the Bank and its consolidated subsidiaries periodically check the financial condition of its customers based on predefined policies and procedures and acts to secure loans as necessary.

21. Securities Loaned

Securities include securities loaned under unsecured lending agreements (Saiken Taishaku Torihiki) totaling nothing as of March 31, 2024 and 2023.

Securities borrowed under unsecured borrowing agreements (Saiken Taishaku Torihiki) and securities purchased under resale agreements and cash-collateralized borrowing agreements and others, which can be sold or repledged by the Bank, include securities repledged of ¥824,702 million (\$5,451 million) and ¥1,420,147 million as of March 31, 2024 and 2023, respectively, and include securities held without repledged of ¥22,480 million (\$148 million) and ¥61,085 million as of March 31, 2024 and 2023, respectively. No such securities are re-loaned to the third parties.

22. Paid-in Capital

	Millions of Yen		Millions of U.S. Dollars
As of March 31	2024	2023	2024
Common Stock	¥4,015,198	¥4,015,198	\$26,539
Other Stock	24,999	24,999	165
Total	¥4,040,198	¥4,040,198	\$26,704

The Common Stock account includes lower dividend rate stock with a total par value of ¥3,589,481 million (\$23,725 million) and ¥3,589,481 million as of March 31, 2024 and 2023, respectively.

Lower dividend rate stock is similar to regular common stock but has been issued on the condition that the dividend yield will be set below that relating to common stock.

The Other Stock of ¥24,999 million (\$165 million) was reclassified from preferred stock following the cancellation of preferred stock, in accordance with Article 15-1-1 of Act on Preferred Equity Investment by Cooperative Structured Financial Institution as of May 12, 1993.

32. Financial Instruments

(1) Particulars of Financial Instruments

a. Policy on Financial Instruments

The Bank is a financial institution which takes as its foundation the Japanese agricultural, forestry and fisheries industry cooperatives. The Bank mainly raises procurement funds from its cooperative members' deposits (mainly 1 year) and various financial markets, and invests these funds mainly in loans and securities. The Bank oversees the management of its securities based on the fundamental concept "globally diversified investment." In terms of geographical area, the Bank invests in Japan, the United States, Europe, and other regions. The Bank classifies its assets as bonds, equities, credit assets, and alternative investments, depending on the investment allocation. The Bank possesses various financial assets and liabilities, and its integrated risk management framework is conducted in concert with its financial management framework (asset and liability management ("ALM"), market portfolio management, credit portfolio management and others). In addition, these include derivative instruments. It is also important to note that in the management of foreign currency assets, the Bank takes steps to limit the foreign exchange rate risk in most of these investments by employing various tools, such as cross-currency swaps.

Some of the Bank's consolidated subsidiaries conduct banking business, mortgage loan business and other businesses.

b. Contents and Risk of Financial Instruments

The main financial assets of the Bank and its consolidated subsidiaries consist of Loans and Bills Discounted, Securities and Money Held in Trust.

Loans and Bills Discounted are exposed to credit risk. Securities and Money Held in Trust mainly consist of bonds, equities, credit and alternative assets, which are held for held-to-maturity, available for sale, and trading purposes. These securities are exposed to the market risk arising from interest rates, currency exchange rates and price fluctuations, as well as the credit risk and liquidity risk.

The main financial liabilities of the Bank consist of Deposits from members, Debentures, Borrowed Money, Call Money and Bills Sold and Payables under Repurchase Agreements. These financial liabilities are exposed to market risk arising from interest rates and currency exchange rates. Procurement fund from the financial markets is exposed to liquidity risk arising from difficulties of securing necessary funds in certain cases such as market crashes.

Derivative instruments include the transactions accounted for as hedge transactions, as part of our ALM. A portion of interest-related derivative instruments and currency-related derivative instruments are not accounted for as hedge transactions, and are exposed to the market risk arising from interest rates and currency exchange rates.

Ref: Summary of Significant Accounting Policies (3) Financial Instruments c. Hedge Accounting for hedged items and hedging instruments related to hedge accounting, hedge policy and hedge effectiveness

c. Risk Management for Financial Instruments

(a) Integrated Risk Management

The Bank, under its "Basic Policies for Risk Management," focuses on comprehensive risk management, where risks it faces in conducting business are identified and managed taking into account their respective natures, and its overall risk measured using quantitative methods is managed in comparison with its capital, the Bank's financial strength. To implement integrated risk management, the Bank has established the Risk Management Committee. The Committee also ensures that the total amount of risk undertaken is kept within the Bank's financial strength. The Bank has also established a number of committees which are categorized according to the type of risk they handle, e.g. the Portfolio Management Committee (market risk, credit risk, liquidity risk), the Credit Committee, the Food and Agri Finance Committee (credit risk), and other committees, to enable the top management to discuss risk management policies, including planned risk-taking. The framework also requires the integrated risk management situation to be regularly reported to the Board of Directors.

The Bank's consolidated subsidiaries have managed to align each risk management framework in accordance with the Bank's "Management and Operation Policy for Group Companies," taking account of the Bank's "Basic Policies for Risk Management" as well as the nature of its own business activities and the risk profile.

(b) Market Risk Management

The Bank has established its "Policies and Procedures for Market Risk Management" and other rules for market risk, and aligns its market risk management framework with other relevant frameworks, policies and procedures.

Specifically, through the investment execution process, the Bank ensures the segregation of duties among divisions in charge for decisions (planning) on allocation policy, execution of individual transactions, and monitoring of risk positions. The Portfolio Management Committee sets market portfolio allocation policy, the front sections execute the transactions in accordance with the allocation policy, and the middle sections conduct monitoring.

The risk balance of the market portfolio is managed by analyzing and understanding market portfolio conditions based on the degree of market risk measured by the middle sections, including the amount of aggregate risk, risk indicators such as Value at Risk (VaR) and interest rate risk sensitivity, and correlation among asset classes. In principle, market risk measurements cover all financial assets and liabilities in the Bank's portfolio and make use of the Internal Model for the calculation of VaR.

From a risk management perspective, the front sections executing trades for the trading accounts are explicitly separated from the front sections executing trades for the banking accounts. Targets for profits, and position and loss limits are revised semi-annually. Progress in achieving profit targets within approved limits is monitored on a daily basis. When positions or losses exceed approved limits, the middle sections alert the front sections to take appropriate action, which includes preparing corrective measures, reducing trading volumes, or suspending trading altogether.

The Bank adopts the historical simulation method to measure the VaR of the trading securities within Trading Assets and certain interest-related, bond-related or other derivative transactions within Derivative Instruments, which are accounted for as trading operations. The market risk (the estimate of the potential loss) of the Bank's trading operations as of March 31, 2024 and 2023 summed up to ¥2 million (\$0 million) and ¥2 million, respectively, in total under the historical simulation method with the holding period of one business day, a 99% confidence interval, and the observation period of 750 business days.

In order to measure the VaR of the financial assets and liabilities from the banking operations (the operations other than trading operations), the Bank adopts the historical simulation method. The market risk (the estimate of the potential net loss) of the Bank from the banking operations totaled ¥3,035,649 million (\$20,065million) and ¥2,670,731 million as of March 31, 2024 and 2023, respectively, under the historical simulation method with holding period of 1 year, a 99.5% confidence interval, and the observation period from fiscal year 1995 to recent day. Since the Bank adopts mid- to long-term investment policies, as to the impact of the short-term market volatilities, the variance-covariance method VaR and others are separately calculated while market risks are basically measured by using the historical simulation method VaR as mentioned above.

The Bank also performs a back-testing to compare the model-measured VaR with the actual profits and losses. From the back-testing for the fiscal years ended March 31, 2024 and 2023 actual results, the Bank had only one exception for each fiscal year where the actual loss exceeded VaR and concludes that the adopted measurement method provides a sufficient accuracy of the market risk measurement. VaR, however, is designed to measure the market risk under the certain occurrence probability hypothesis based on the statistical calculation of the historical market movements. Therefore, VaR may not cover the risks in extremely volatile market conditions. The Bank measures losses under various scenarios (stress test) to complement the said limits and weakness of the model.

(c) Credit Risk Management

The Bank has established its "Policies and Procedures for Credit Risk Management" and other rules for credit risk, and operates with an internal rating system as the main framework to manage credit risks arising from investment/financing activities in portfolio management based on globally diversified investments. The Bank's major credit risk assets are loans for and investments in the AFF industries and related companies and other organizations, credit investments such as domestic and foreign securitized products, bonds and loans, and alternative investments such as private equity and real estate equity.

The Bank's credit risk management framework is comprised of several committees (Including the Risk Management Committee, the Portfolio Management Committee, Food and Agri Finance Committee, Credit Committee and other committees), which determine the credit risk management framework as well as credit investment policy. Front sections execute loan transactions and credit investments in accordance with the credit policy and within the credit limits approved by the committees. Middle sections, which are segregated from the front sections, monitor changes in the credit risk portfolio and report them to the committees. Those reports are used for upgrading the risk management framework and for future credit investment planning.

The credit risk for each loan is assessed by the internal rating, the purposes of the loan and loan structure, etc., with the comprehensive consideration of such factors as the risk-return balance and consistency with the basic strategy for the borrower.

In credit portfolio management, the Bank is focused on managing credit concentration risk as investments and loan projects have become larger in scale and more globalized, etc.

By setting a soft limit and monitoring in light of multifaceted perspectives including borrowers' internal rating, business sector and operational region and hedging by loan liquidation, the Bank is controlling credit concentration risk appropriately.

(d) Liquidity Risk Management

The Bank manages liquidity risk in accordance with its “Policies and Procedures for Liquidity Risk Management.” Considering the profiles of the Bank’s ALM together with the relatively less liquid assets that it holds, the Bank takes initiatives to diversify and enhance the varieties of funding instruments, placing an emphasis on the stability of cash flows. Cash flow management is conducted on an aggregate basis at the head office in collaboration with relevant branches, and various indicators for each currency, funding instrument and funding base are established by the Risk Management Committee. The cash flow management plan, which sets out specific cash flow policy, is approved by the Portfolio Management Committee.

d. Supplementary Explanations for the Fair Value of Financial Instruments and Other Items

As the reasonably estimated amounts are calculated based on certain assumptions, these estimates could be significantly affected by different assumptions.

(2) Disclosures Regarding the Fair Value of Financial Instruments and Other Items

Stocks and others with no market prices are excluded from the table below(ref. Note 1). In addition to this, Receivables under Resale Agreements, Cash and Due from Banks, Negotiable Certificates of Deposit, Call Money and Bills Sold, Payables under Repurchase Agreements, and Short-term Entrusted Funds, are omitted because these instruments are settled in a short period and then their fair values would approximate their carrying values.

“Consolidated Balance Sheet Amount,” “Fair Value” and “Difference” as of March 31, 2024 and 2023 are as follows:

	Millions of Yen			Millions of U.S. Dollars		
	Consolidated Balance Sheet Amount	Fair Value	Difference	Consolidated Balance Sheet Amount	Fair Value	Difference

Transactions Accounted for as Hedge Transactions	(247,955)	(247,955)	—
Total Derivative Instruments	¥ (242,989)	¥ (242,989)	¥ —

(*) 1. Money Held in Trust and Loans and Bills Discounted are net of Reserve for Possible Loan Losses. Money Held in Trust is presented by net on the consolidated balance sheet as the reserve amounts are immaterial.
2. Derivative Instruments are excluded from Trading Assets.
3. Derivative Instruments within Trading Assets, Trading Liabilities, Other Assets and Other Liabilities are shown by net position. Receivables and payables which arise from Derivative Instruments are shown on a net basis.
The fair value of certain interest rate swaps to which the accrual method of hedge accounting is applied, as specifically permitted for certain interest rate swaps, is reflected in fair value of Loans and Bills Discounted, Debentures and Borrowed Money as the hedging instruments are accounted for together with the Loans and Bills Discounted and other items.

(Note) The following tables list Consolidated Balance Sheet Amount of Stocks and others with no market prices, Investments in Partnership and others as of March 31, 2024 and 2023, respectively:
“Securities” in “Disclosures Regarding the Fair Value of Financial Instruments and Other Items” excludes these financial instruments.

As of March 31, 2024	Millions of Yen	Millions of U.S. Dollars
Stocks and others with no market prices (*1)	¥227,744	\$ 1,505
Investments in Partnership and others (*2)	946,857	6,258

(*) 1. The amount of revaluation losses for the fiscal year ended March 31, 2024 was ¥988 million (\$6 million) on Unlisted Stocks.
2. Investments in Partnership are out of scope from the disclosure of the fair value measurement due to being applied to Article 24-16 of Implementation Guidance on Accounting Standard for Fair Value Measurement (ASBJ Guidance No. 31 on 17th June 2021).

As of March 31, 2023	Millions of Yen
Stocks and others with no market prices (*1)	¥ 203,594
Investments in Partnership and others (*2)	¥1,235,145

(*) 1. The amount of revaluation losses for the fiscal year ended March 31, 2023 was nil on Unlisted Stocks.
2. Investments in Partnership are out of scope from the disclosure of the fair value measurement due to being applied to Article 24-16 of Implementation Guidance on Accounting Standard for Fair Value Measurement (ASBJ Guidance No. 31 on 17th June 2021).

(Note 2) The redemption schedule of money claims and securities with stated maturities after the consolidated balance sheet date is as follows:

	Millions of Yen

(3) Disclosures Regarding the Fair Value of Financial Instruments and Other Items by Level within the Fair Value Hierarchy

According to observability and significance of inputs used by calculating fair values, fair values for these financial instruments are classified into the following three-level hierarchy.

Level 1 - Unadjusted quoted prices for identical instruments in active markets.

Level 2 - Observable inputs other than Level 1 prices that are either directly or indirectly observable for the financial instrument.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the instruments.

If multiple inputs which have a significant impact on market value calculation are used, a financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Financial assets and liabilities whose fair values are equal to consolidated balance sheet amounts are as follows.

As of March 31, 2024	Millions of Yen			Millions of U.S. Dollars		
	Level 1	Level 2	Level 3	Level 1	Level 2	Level 3

(Note 1) Calculation Methods and Inputs for the Fair Value of Financial Instruments are as follows:

Assets

Monetary Claims Bought

Monetary Claims Bought are valued and classified according to the same methods described in “Loans and Bills Discounted” and “Securities” below.

Trading Assets

Trading Securities are valued and classified according to the same methods described in “Securities” below.

Money Held in Trust

Loans and Bills Discounted and Securities included in Money Held in Trust are valued and classified according to the same methods described in “Loans and Bills Discounted” and “Securities” below.

Relevant notes concerning the fair value of Money Held in Trust of each classification are described in section 34. Fair Value of Money Held in Trust.

Securities

When unadjusted quoted prices are available in an active market, such securities are classified into Level 1 of the fair value hierarchy. Examples of Level 1 securities include listed equities and government bonds.

When quoted prices are available but not traded actively, such securities are classified into Level 2 of the fair value hierarchy. Level 2 securities mainly include municipal bonds and corporate bonds. When quoted prices are not available, the Bank and its subsidiaries generally estimate fair values by using prices obtained from independent pricing vendors, or by using valuation technique such as Discount Cash Flow method. As for valuation, the Bank and its subsidiaries maximize the use of observable inputs. Inputs include default rates, recovery rates, prepayment rates and discount rates. Where significant inputs adopted to the fair value measurements for securities are unobservable, such securities are classified into Level 3 of the fair value hierarchy.

In addition to the factors mentioned above, probability of redemption or sale at net asset value are reflected on classification of the fair value hierarchy for Investment Trusts. Net asset value for certain Investment Trusts is adjusted by liquidity discount and such Investment Trust is classified into Level 3 of the fair value hierarchy.

Loans and Bills Discounted

The fair value of Loans and Bills Discounted with floating rates approximates the book value since it is repriced reflecting market interest fluctuations within a short period, unless the creditworthiness of the debtors has changed significantly after execution.

Accordingly, the book value is deemed to be the fair value. As for Loans and Bills Discounted with fixed rates, the fair value is calculated according to the Discounted Cash Flow method. The main inputs include the default rates based on the current credit rating of the debtors, recovery rates, and other inputs. As for mortgages, the fair value is calculated according to the Discounted Cash Flow method. The main inputs include the default rates, recovery rates, prepayment rates and other inputs.

As for Loans and Bills Discounted to doubtful debtors and others, the fair value is calculated by the present value of expected future cash flows or the estimated recovery amount of collateral and guarantee.

With respect to Loans and Bills Discounted without stated maturity for which credit is extended up to the value of the collateral assets, the book value is deemed to approximate the fair value, taking into account expected maturities, interest rates and other terms. All of Loans and Bills Discounted are classified into Level 3 of the fair value hierarchy since significant inputs for the assets are unobservable.

Liabilities**Deposits**

With respect to demand deposits, the amounts payable on demand as of the consolidated balance sheet date (the book value) are estimated at fair value. The fair value of time deposits with floating rates approximates the book value since it is repriced reflecting market interest rate fluctuations within a short period (1 year or less), unless the creditworthiness of the Bank and its consolidated subsidiaries has changed significantly. Accordingly, the fair value is deemed to be the book value. As for time deposits with fixed rates, the fair value is calculated according to the Discounted Cash Flow method, and these discount rates are the currently-applied deposit rates determined as interest rates similar to the market basis. Some contractual terms are short-term (1 year or less), and the fair value approximates the book value. Accordingly, the fair value is deemed to be the book value. All of the calculated fair values for deposits are classified into Level 2 of the fair value hierarchy.

Debentures

As for Debentures, the fair value is based on the quoted market price if available, or calculated according to the Discounted Cash Flow method. The main input of this method is the rate which would be applied if a similar debenture was issued. Debentures are classified into Level 2 of the fair value hierarchy considering the market liquidity for those.

Borrowed Money

The fair value of Borrowed Money with floating rates approximates the book value since it is repriced reflecting market interest rate fluctuations within a short period (1 year or less), unless the creditworthiness of the Bank and its consolidated subsidiaries has changed significantly. Accordingly, the book value is deemed to be the fair value. Therefore, Borrowed Money with floating rate is classified into Level 2 of the fair value hierarchy.

As for Borrowed Money with fixed rates, the fair value is calculated according to the Discounted Cash Flow method. The input of this method is the interest rate which would be applied to a similar borrowed money. Where unobservable inputs have a significant impact on the fair value for Borrowed Money with fixed rates, the instrument is classified into Level 3 of the fair value hierarchy. Where not, the instrument is classified into Level 2 of the fair value hierarchy. The fair value of the Borrowed Money within a year or less with fixed rates approximates the book value and then the fair value is deemed to be the book value. Such Borrowed Money is classified into Level 2 of the fair value hierarchy.

Derivative Instruments

When unadjusted quoted prices are available for Derivative instruments in an active market, such instruments are classified into Level 1 of the fair value hierarchy. Examples of these Derivative instruments include Bond Futures, Interest Rate Futures and others.

Where quoted market price is unavailable, the Bank estimates fair values for Derivative instruments by a net present value method, an option pricing model and other methods as appropriate. Main inputs used by valuation methods mentioned above are interest rates, foreign currency exchange rates, volatility and other variables. Further, the fair value for derivative instruments such as Swap and others is reflected on the price adjustment based on credit risk of counter parties and the Bank itself. Where unobservable inputs are not adopted or their impact is not significant on the fair value for Derivative instruments, such derivative instruments are classified into Level 2 of the fair value hierarchy. Derivatives that are evaluated using valuation techniques with significant unobservable inputs are classified into Level 3 of the fair value hierarchy.

Relevant notes regarding the fair value of derivative instruments are described in section 35. Fair Value of Derivative Instruments.

(Notes 2) The Fair value of Level 3 for financial instruments recorded at fair value on the consolidated balance sheet is as follows

Quantitative Information of Significant Unobservable Inputs about Level 3 Fair Value Measurements

As of March 31, 2024

Explanation of Market Value Evaluation Process

Supervisory Department for Fair Value Measurement in the Bank establishes guidelines and procedures for fair value and Fair Value Measurement Department calculates fair value in compliance with these guidelines and procedures. Assessment Department, which is independent from Fair Value Measurement Department verifies appropriateness of the calculation result of fair value, and the result of the verification is reported in the Risk Management Committee. Thus, the Bank confirms the appropriateness of guidelines and procedures for fair value measurement.

Moreover, as for fair value measurement, the Bank adopts pricing models which the most properly reflect on types, characteristics, and risks for individual financial instrument. Where market values obtained from independent pricing vendors are used, the Bank verifies the validity of the vendors' market values by means of appropriate approaches such as assessment of pricing models and inputs which the vendors adopt, comparison with fair values of similar financial instruments and others.

Securities Recognized for Revaluation Loss

Securities other than those for trading purposes (except Stocks and others with no market prices and Investments in Partnership) are revalued to their fair value, and the difference between the book value and the fair value is treated as a realized loss for the fiscal years ended March 31, 2024 and 2023 (“revaluation loss”), if the fair value has significantly deteriorated from the book value unless a recovery in the fair value is deemed probable.

The amount of revaluation loss for the fiscal year ended March 31, 2024 was ¥4,377 million (\$28 million) including ¥4,377 million (\$28 million) on Investment Trusts.

The amount of revaluation loss for the fiscal year ended March 31, 2023 was nil.

The criteria for determining whether the securities’ fair value has “significantly deteriorated” are outlined as follows:

Securities whose fair values are equal to or less than 50% of their book value

Securities whose fair values remain between 50% (exclusive) and 70% (inclusive) of their book value for a certain period

37. Appropriation of Retained Earnings

No dividends were declared at the Council of Delegates held on June 21, 2024.

38. Subsequent Events

At the Bank's Board of directors held on July 31, 2024, the Bank resolved to redeem approximately 0.7 trillion yen existing perpetual subordinated loans borrowed from the Owners of the Bank and to newly finance through lower dividend rate stocks as follows.

At the same time, the resolution was passed to borrow approximately 0.6 trillion yen fixed-term subordinated loans during the fiscal year ended March 31, 2025.

These are also scheduled to be resolved at the Bank's Supervisory Committee on August 1, 2024.

(1) Units to be paid

7,360,585,000

(2) Amount to be paid

¥100 per unit

(3) Total amount to be paid

¥736,058.5 million

(4) Total capitalization

¥736,058.5 million

(5) Method of capital increase

Prefectural Banking Federations of Agricultural Cooperatives (JA Shinnoren), Japan Agricultural Cooperatives (JA), Prefectural Banking Federations of Fishery Cooperatives (JF Shingyoren) and Japan Fishery Cooperatives (JF) (to be allotted based on individual discussion with them)

(6) Allotment date

August 1, 2024

(7) Subscription period

From August 23, 2024 to September 24, 2024

(8) Payment date

September 30, 2024

(9) Purpose

Improvement of its capital profile in respect to actions for improving the contents of the portfolio and establishing solid earnings base.

Independent Auditor's Report

The Board of Directors
The Norinchukin Bank

The Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of The Norinchukin Bank and its consolidated subsidiaries (the Group), which comprise the consolidated balance sheet as at March 31, 2024, and the consolidated statements of operations, comprehensive income, capital surplus and retained earnings, and cash flows for the year then ended, and notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at March 31, 2024, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with accounting principles generally accepted in Japan.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in Japan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Japan, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of the audit of the consolidated financial statements as a whole, and in forming the auditor's opinion thereon, and we do not provide a separate opinion on these matters.

Judgements over recoverability of deferred tax assets	
Description of Key Audit Matter	Auditor's Response
As of March 31, 2024, the amount of deferred tax assets recorded on the Bank's consolidated balance sheet was 3,731 million yen, as stated in Section (16) "Significant Accounting Estimates" of Note 2 "Summary of Significant Accounting Policies" to the	Our audit procedures performed to examine the appropriateness of judgements over recoverability of deferred tax assets of the Bank included the following, among others: (1) Evaluation of internal control

Judgements over recoverability of deferred tax assets	
Description of Key Audit Matter	Auditor's Response
<p>consolidated financial statements.</p> <p>The Bank recognizes Deferred Tax Assets for deductible temporary differences that are deemed to have the effect of reducing the tax burden in the future (i.e., recoverability). In determining the recoverability of deferred tax assets, the Bank recognizes Deferred Tax Assets based on the estimates such as the classification of an entity and the future taxable income as well as the scheduling of deductible temporary differences, in accordance with Implementation Guidance on Recoverability of Deferred Tax Assets (ASBJ Guidance No. 26)".</p> <p>In determining the classification of an entity, the Bank considers the estimates of future taxable income based on the situation where financing costs, such as funding costs in foreign currencies, have increased as a result of the interest rate hikes, mainly in Europe and the United States, as well as the trends of the past and current period taxable income.</p> <p>The estimation of future taxable income is based on medium- to long-term earnings prospects adjusted by the future uncertainty, considering various simulations and other factors. As the Bank has diverse financial assets and liabilities based on the basic concept of "globally diversified investment", the key assumptions are the forecasts of future financial and economic environment such as market fluctuations of interest rates and foreign exchange rates, and the trends of the financial position by the Bank's portfolio management in response to such forecasts.</p> <p>These key assumptions are affected by the financial and economic environments and the trends of the financial position, and are therefore subject to a high degree of the estimation uncertainty and management's judgements.</p>	<ul style="list-style-type: none"> We evaluated the design and tested the operating effectiveness of the Bank's internal controls over recognition of deferred tax assets. <p>(2) Estimate of taxable income in the future</p> <ul style="list-style-type: none"> We examined whether the estimates of future taxable income and the underlying medium- and long-term earnings prospects are consistent with the various simulations and other factors approved by the Board of Directors. We recalculated the medium- and long-term earnings prospects, which serve as a basis for estimating future taxable income, based on the outlook of the future financial and economic environment and of the expected asset balances. The key assumptions of the forecasts of future financial and economic environment such as market fluctuations of interest rates and foreign exchange rates, which are included in the medium- and long-term earnings prospects, were assessed for consistency with available external information, such as market forecasts and reports published by external organizations. The key assumptions of the trends of the financial position by the Bank's portfolio management, included in the medium- and long-term earnings prospects, were assessed in terms of the consistency with the investment plans as well as the financial metrics assumed by the auditor. We independently estimated the taxable income incorporating additional uncertainty and assessed its impact on the determination of recoverability of deferred tax assets.

Judgements over recoverability of deferred tax assets	
Description of Key Audit Matter	Auditor's Response
Accordingly, appropriateness of judgements over recoverability of deferred tax assets is considered a key audit matter.	

Measurement of reserve for possible loan losses to the loans and bills discounted	
Description of Key Audit Matter	Auditor's Response
<p>The Norinchukin Bank (the Bank) is engaged in lending to a wide variety of industries in Japan and overseas. The amount of the loans and bills discounted included in the consolidated balance sheet as of March 31, 2024 was 17,599,257 million yen, accounting for 17% of the Total Assets.</p> <p>The collectability of loans and bills discounted recorded by the Bank is affected by uncertainties including the financial condition of the debtors and the deterioration of the economic environment, possibly leading to loan losses.</p> <p>To provide for such loan losses, the Bank calculates the amount of expected losses that will not be collected and records them as reserve for possible loan losses.</p> <p>The amount of the Reserve for Possible Loan Losses included in the consolidated balance sheet as of March 31, 2024 was 125,424 million yen.</p> <p>The reserve for possible loan losses is calculated in accordance with the Bank's internal rules for self-assessment of asset quality and recognizing write-offs and provisions.</p> <p>The calculation process includes the determination of debtor classification and certain calculation method according to the debtor classification.</p> <p>The specific method of recognition is described in Section (8) "Reserve for Possible</p>	<p>Our audit procedures performed to evaluate the appropriateness of the debtor classification determined by the Bank as well as the appropriateness of recognition of reserve for possible loan losses adjusted for risks identified based on the future forecasts included the following, among others:</p> <p>(1) Evaluation of internal control</p> <ul style="list-style-type: none"> We evaluated the design and tested the operating effectiveness of the Bank's internal controls over determination of debtor classification and recognition of reserve for possible loan losses adjusted for the risks identified based on the future forecasts. <p>(2) Determination of debtor classification</p> <ul style="list-style-type: none"> We selected samples of debtors by taking into account the type of business of the debtor, financial position, business performance and geopolitical risks, in addition to considering the monetary impact of changes in debtor classification on the amount recorded in reserve for possible loan losses. We evaluated the selected debtors' recent financial position, cash flows and business performance by inspecting a set of documents related to the Bank's self-assessment of asset quality of the debtors. We also made inquiries to the Credit Risk Management Division and other relevant divisions to obtain supporting evidence as

Measurement of reserve for possible loan losses to the loans and bills discounted	
Description of Key Audit Matter	Auditor's Response
<p>Loan Losses” and (16) “Significant Accounting Estimates” of Note 2 “Summary of Significant Accounting Policies” to the consolidated financial statements.</p> <p>(1) Determination of debtor classification</p> <p>In determining the debtor classification, the debtor's future debt repayment capacity is assessed, taking into account the debtor's future forecasts including its expected business performance, considering the debtor's solvency based on certain factors such as the debtor's type of business, financial position, cash flows and profitability. The debtor's future forecasts including its expected business performance are the key assumptions in determining the debtor classification.</p> <p>(2) Recognition of reserve for possible loan losses adjusted for the risks identified based on future forecasts</p> <p>In recognizing the reserve for possible loan losses, the amount of expected losses is estimated after adjusting for the risks identified based on future forecasts.</p> <p>Specifically, the reserve for possible loans losses is recorded, taking into account the current position in economic cycles and the likelihood of each scenario in light of future outlook, by referring to historical loan losses, based on the macroeconomic indicators (Indexes of Business Conditions (Composite Index (Coincident Index))) which are highly correlated to historical records of loan losses and the Bank's outlook for economic fluctuations. The current position in economic cycles and the likelihood of each scenario in light of future outlook are the key assumptions in predicting future forecasts.</p> <p>The future forecasts of debtors' performance, the current position in economic cycles and the likelihood of each scenario in light of</p>	<p>necessary.</p> <ul style="list-style-type: none"> We examined the reasonableness and likelihood of future outlook of individual debtors by analyzing the trends from past results of the major financial indicators. Our procedures also consisted of evaluating the accuracy of estimates based on the historical achievement of business plans in previous fiscal years. We also considered and evaluated relevant market and industry information, when available, that corroborated or contracted managements assumptions used in the classification of debtors. <p>(3) Recognition of reserve for possible loan losses adjusted for the risks identified based on the future forecasts</p> <ul style="list-style-type: none"> We examined the likelihood of each scenario based on the current position in economic cycles and the future forecasts by comparing the documents of the decision-making bodies that discussed the future forecasts with available external information, such as external economists' reports. In performing these procedures, we involved our risk management specialists. We examined the amount of the reserve for possible loan losses calculated based on the assumptions applied, by inspecting the inputs and testing the accuracy through recalculation.

Measurement of reserve for possible loan losses to the loans and bills discounted	
Description of Key Audit Matter	Auditor's Response
future outlook are highly dependent on estimation uncertainty and the management's judgement since they are affected by changes in the business environment surrounding the debtors as well as by the slowdown of overseas economies resulting from the materialization of the effect of tightening monetary policy, the long-term slump in consumption due to sluggish real wage growth in Japan, and further worsening geopolitical risks. Based on the above, the appropriateness of the determination of debtor classification and the recognition of Reserve for Possible Loan Losses adjusted for the risks identified based on future forecasts is considered a key audit matter.	

Other Information

The other information comprises the information included in the ANNUAL REPORT Appendix / Corporate Data as a part of the ANNUAL REPORT (but does not include the consolidated financial statements and our auditor's report thereon), which we obtained prior to the date of this auditor's report, and the ANNUAL REPORT Key Contents Integrated Report as a part of the ANNUAL REPORT, which are expected to be made available to us after that date. Management is responsible for preparation and disclosure of the other information. Audit & Supervisory Board Member and Audit & Supervisory Board are responsible for overseeing the Group's reporting process of the other information.

Our opinion on the consolidated financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of Management, Audit & Supervisory Board Member and Audit & Supervisory Board for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in Japan, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern and disclosing, as required by accounting principles generally accepted in Japan, matters related to going concern.

Audit & Supervisory Board Member and Audit & Supervisory Board are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with auditing standards generally accepted in Japan, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
- Consider internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances for our risk assessments, while the purpose of the audit of the consolidated financial statements is not expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation in accordance with accounting principles generally accepted in Japan.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with Audit & Supervisory Board Member and Audit & Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide Audit & Supervisory Board Member and Audit & Supervisory Board with a statement that we have complied with the ethical requirements regarding independence that are relevant to our audit of the consolidated financial statements in Japan, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied to reduce threats to an acceptable level.

From the matters communicated with Audit & Supervisory Board Member and Audit & Supervisory Board, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Convenience Translation

The U.S. dollar amounts in the accompanying consolidated financial statements with respect to the year ended March 31, 2024 are presented solely for convenience. Our audit also included the translation of Japanese yen amounts into U.S. dollar amounts and, in our opinion, such translation has been made on the basis described in Note 1 to the consolidated financial statements.

Fee-related Information

The fees for the audits of the financial statements of The Norinchukin Bank and its subsidiaries and other services provided by us and other EY member firms for the year ended March 31, 2024 are 348 million yen and 211 million yen, respectively.

Interest Required to Be Disclosed by the Certified Public Accountants Act of Japan

Our firm and its designated engagement partners do not have any interest in the Group which is required to be disclosed pursuant to the provisions of the Certified Public Accountants Act of Japan.

Capital Adequacy (Consolidated)

Disclosure Regarding Capital Adequacy and Features of Regulatory Capital Instruments

The Norinchukin Bank (the “Bank”) calculates its capital adequacy ratio based on the formula contained in Notification No. 4 of the 2006 Financial Services Agency and the Ministry of Agriculture, Forestry and Fisheries of Japan entitled “Standards for Judging the Soundness of Management of The Norinchukin Bank” (hereinafter, “Notification Regarding Capital Adequacy Ratio”). In addition, to calculate risk-weighted assets for credit risk, the Bank has adopted the “Advanced Internal Ratings-Based Approach (A-IRB) (partially the Foundation Internal Ratings-Based Approach (F-IRB)).”

The Bank calculates its leverage ratio based on the formula contained in Notification No. 4 of the 2019 Financial Services Agency and the Ministry of Agriculture, Forestry and Fisheries of Japan entitled “Standards for Judging the Soundness of Management of The Norinchukin Bank” (hereinafter referred to as the “Notification on the Leverage Ratio”).

As for the external audit on the calculation of capital adequacy ratio and leverage ratio (on a consolidated and a non-consolidated basis), the Bank has been audited via

the agreed-upon procedures and operation by Ernst & Young ShinNihon LLC pursuant to the “Practical Guidelines for the Agreed-upon Procedures and Operations for the Inspection of the Capital Ratio and Leverage Ratio Calculation Framework” (JICPA Industry Committee Report No. 4465). These operations do not constitute part of the consolidated financial statements or financial statements or part of the audits on the internal control related to the financial reporting. Ernst & Young ShinNihon LLC conducts these operations not to express any audit opinion or conclusion regarding the capital and leverage ratios themselves and/or the internal control regarding the calculation of capital and leverage ratios. Rather, Ernst & Young ShinNihon LLC implements such procedures within the range that was agreed upon with the Bank and reports the results of the review to the Bank.

The disclosure requirements for the Bank are provided in Notification No. 6 of the 2007 Financial Services Agency and the Ministry of Agriculture, Forestry and Fisheries of Japan entitled “Disclosure Items Related to Capital Adequacy of The Norinchukin Bank” (hereinafter, “Disclosure Notification”). These disclosures as well as the features of regulatory capital instruments can be found in the IR Library of the Bank’s website at <https://www.nochubank.or.jp/>.

Remarks on Computation of the Consolidated Capital Adequacy Ratio

Scope of Consolidation

- Reason for discrepancies between companies belonging to the Bank’s group that are required to compute a consolidated capital adequacy ratio, as specified in the Notification Regarding Capital Adequacy Ratio, Article 3 (hereinafter, “the Consolidated Group”) and the companies included in the scope of consolidation, based on “Ordinance on Terminology, Forms and Preparation Methods of Consolidated Financial Statement” under Ministerial Ordinance No. 28, issued by the Ministry of Finance in 1976:

Not applicable

- As of March 31, 2024, the Bank had 22 consolidated subsidiaries and firms. The names and principal lines of business of the primary subsidiaries are as follows:
 1. Norinchukin Trust & Banking Co., Ltd.: Trust and banking business

2. Kyodo Housing Loan Co., Ltd.: Loans and guarantees for housing

- Companies belonging to the Consolidated Group but not included in the scope of consolidation:
 - Not applicable
- Companies not belonging to the Consolidated Group but included in the scope of consolidation:
 - Not applicable
- Affiliated companies engaged in financial service business that were subject to the provisions of Article 9 of the Notification Regarding Capital Adequacy Ratio:
 - Not applicable
- Restrictions on the transfer of funds and capital between the members of the Consolidated Group:
 - Not applicable

Companies with Less than the Regulatory Required Capital and the Amount of Shortfall

With regard to the group companies that are subject to capital deduction, as provided for in the Notification

Regarding Capital Adequacy Ratio, the names of those companies whose capital is less than the regulatory required capital and the total amount of shortfall in their capital:

Not applicable

Overview of Internal Capital Adequacy Assessment Process

The Bank conducts the Internal Capital Adequacy Assessment Process (ICAAP) and comprehensively manages its capital resources.

The ICAAP is a series of processes for ensuring the recognition of the capital-related tolerable risks for the Bank and the risk tolerance level from the perspective of risk management in light of the business model and risk profile of the Bank, in accordance with its management policies, business strategies, expected return and risk appetite, all of which are specified in the RAF, and

demonstrating that the Bank maintains a sufficient level of internal capital to cover risks based on such recognition. In addition to monitoring the current status of the capital resources that the Bank holds, the Bank conducts comprehensive assessments mainly by verifying the appropriateness of its framework for maintaining capital adequacy and its operation as well as confirming the sturdiness and flexibility of operations from a forward-looking perspective by implementing comprehensive stress tests.

Overview of the Risk Characteristics and Risk Management Policies, Procedures and Framework of the Entire Consolidated Group

Overview of the Risk Characteristics and Risk Management Policies, Procedures and Framework of the Entire Consolidated Group

■ Approach to Risk Management

Risk management initiatives by the Bank are stipulated in its Basic Policies for Risk Management. The policies identify the types of risks to be managed and the basic framework for risk management, including organizational structure and methodology. In accordance with the policies, the Bank manages individual risks after assessing the materiality of risks and identifying risks to be managed. The Bank also implements integrated risk management by measuring the overall amount of risk using quantitative methods and comparing it with the Bank's capital resources.

To implement integrated risk management, the Bank has set up the Risk Management Committee. At the committee, the Bank's management discusses important issues relating to its risk management framework and capital adequacy, and determines respective management frameworks. The committee also ensures that the

total risk amount is kept within capital resource limits. The structure also requires that the integrated risk management status (such as capital and risk status, and significant decisions made by the Risk Management Committee) be reported to the Board of Directors on a regular basis. The Bank has also established a number of committees based on the type of risk, i.e. the Portfolio Management Committee (market risk, credit risk and liquidity risk), the Credit Committee, the Food and Agri Finance Committee (credit risk), and the Operational Risk Management Committee (operational risk), to enable the management to discuss and decide what measures are needed to control risks that arise in the execution of management strategy and business policies within an acceptable level. In line with the controls described above, under the risk management framework including economic capital management determined by the Risk Management Committee, and based on the need to carefully maintain a balance among return, capital and risk, in addition to due consideration for liquidity, the Bank has built and operated a forward-looking risk management framework by steadily grasping the trends in international financial regulations and exercising effective restraints.

In line with the Basic Policies for Risk Management, the Bank's group companies have established their own risk management systems by setting effective management policies and frameworks, etc., according to the content of their businesses and risk characteristics, in consultation with the Bank.

■ Integrated Risk Management

Based on the Basic Policies for Risk Management, the Bank stipulates a core risk management framework that manages risk quantitatively and comprehensively in comparison with capital, which represents its financial strength. The core function in this framework is economic capital management.

Under economic capital management, risks to be covered by capital are measured, and the internal capital for this purpose is applied in advance. The amount of risk is controlled so as not to exceed the applied internal capital by monitoring the changes in the amount of risk caused by market fluctuations and additional risk-taking in a timely manner during the fiscal year.

The Bank categorizes the types of risks to be controlled into market risk, credit risk and operational risk. To maximize the benefit of the globally diversified investment concept, the Bank manages the economic capital on an aggregate basis instead of allocating the capital to each asset class or to each business segment, as the Bank believes such an approach should fit in the business profile of the Bank. In addition, the definition of internal capital applied and the economic capital management framework are determined by the Board of Directors, while the middle office is responsible for monitoring the fluctuating capital levels and the amount of risk during each fiscal year. These results are reported to the management on a timely basis and used for sharing an awareness of the risk environment between the middle office and the front office.

Measurement of risks is conducted as to all financial assets and liabilities in the Bank's portfolio, in principle. Market risk is measured primarily using a method which simulates scenarios such as interest rate and stock price fluctuations, based on past data (historical simulation method). Credit risk is mainly measured using simulations of scenarios such as default, downgrading and

greater credit spread, upon consideration of credit concentration risk on certain corporate groups, industries and regions. On that basis, in order that the correlation between the risks of market and credit are reflected consistently, their Value-at-Risk (VaR), with a 99.50% confidence interval and one-year holding period, is centrally simulated to measure the integrated risk amount. Also, operational risk is measured by the Standardized Measurement Approach, which is a method of calculation stipulated in the Notification Regarding Capital Adequacy Ratio.

■ Implementation of Stress Tests

Stress tests are performed together with the implementation of the fiscal year's ICAAP and budget planning. By preparing strict stress scenarios that factor in specific timelines and the ripple effects of risks covering the Bank's entire portfolio after analyzing internal and external environments, the Bank verifies the impact of these stresses on profit, capital and risk.

Moreover, stress tests play an important role in the process of formulating portfolio management strategies, which occur along with budget planning. In addition, the Bank also utilizes stress tests for a forward-looking assessment of internal capital adequacy such as reviewing the countermeasures (management actions) to take at times of stress based on the assumed amount of impact on profitability and capital, etc. resulting from stress tests.

■ Market Risk Management

Market risk is the possibility of loss arising from a market event such as fluctuations in the value of assets and liabilities (including off-balance-sheet items) due to fluctuations in various market risk factors, including interest rates, foreign exchange rates and stock prices, and fluctuations in the income generated from those assets and liabilities.

In its portfolio management under the basic concept of "globally diversified investment," the Bank positions market risk as a significant risk factor affecting its earnings base and aims to retain a stable level of profit through active risk-taking supported by an appropriate risk management framework.

■ Market Risk Management Framework

The Bank's market risk management is conducted through the Risk Management Committee being responsible for overall integrated risk management, the Portfolio Management Committee setting market portfolio allocation policies, the middle office monitoring the amount of risk independent of the front office executing transactions.

The principal market portfolio management process is as described below.

Decision Making

Material decisions on market investments are made at the Board level. The Board of Directors formulates the annual allocation policies. Based on the policies, the Portfolio Management Committee-composed of the Board members involved in market portfolio management-makes decisions, together with general managers, on specific policies related to market investments after discussing them.

Decision making on market investments is carried out after examining the investment environment including the financial markets and the economic outlook, current position of the securities portfolio, and Asset and Liability Management (ALM) situation of the Bank. The Portfolio Management Committee holds meetings on a weekly basis, as well as when needed, to respond to changes in market conditions in a flexible manner.

Execution

Based on the investment decisions made by the Portfolio Management Committee, the front office executes securities transactions and risk hedging. The front office is not only responsible for executing transactions efficiently but also monitoring market conditions closely to propose new investment strategies to the Portfolio Management Committee.

Monitoring

The term "monitoring functions" refers to checking whether the execution of transactions made by the front office is compliant with the investment decisions approved by the Portfolio Management Committee, and to measuring the amount of risk in the Bank's investment portfolio. To maintain an appropriate risk balance among asset classes, various risk indicators as well as risk amount for economic capital management are measured and monitored. These functions are fulfilled by the middle office, which is independent of the front office. Matters relevant to market portfolio management (such as market conditions, major investment decisions made by the Portfolio Management Committee, condition of the market portfolio and views on near-term market portfolio management) are reported to the Board of Directors on a regular basis. Monitoring reports are used to analyze the current situation of the market portfolio and as a data source for discussing the investment strategies in the near future at the Portfolio Management Committee.

Matters Relating to Credit Risk

Overview of Credit Risk Characteristics and Risk Management Policies, Procedures and Framework

■ Credit Risk Management

Credit risk is the possibility of loss arising from a credit event such as deterioration in the financial condition of a borrower and economic environment that causes an asset (including off-balance sheet items) to lose value or to be significantly impaired. At the Bank, in its portfolio management based on "globally diversified investments," credit risk, as well as market risk, is positioned as an important risk in optimizing the portfolio. Specifically, credit risk arising from investment and loan activities for the "food and agriculture business" and "invest-

ment business" is appropriately managed by building a management framework centering on the Internal Rating System.

■ Credit Risk Management Framework

The Bank adopts a business model of taking the deposits received by cooperative members from the JA Bank's membership and investing them effectively and consistently and providing stable returns. Therefore, the Bank not only conducts traditional loan and deposit businesses but also develops a broad range of globally diversified investments in Japanese and international financial markets, centering on bonds, stocks, credit assets and alternative assets. As a result, its balance of market

assets—mainly securities—exceeds that of loan assets.

The Bank's credit risk management framework comprises four committees (the Risk Management Committee, the Credit Committee, the Portfolio Management Committee and the Food and Agri Finance Committee) that are managed by the directors and general managers involved in risk management. These committees determine the Bank's credit risk management framework as well as its credit investment policies. The front office executes loan transactions and credit investments in accordance with the credit policies and within the credit limits of these policies. The middle office, which is independent of the front office, monitors changes in the credit risk portfolio and reports them to the committees. Feedback is then used for upgrading the risk management framework and for future credit investment planning.

Each of the four committees has a specific role assigned to it by the management. The Risk Management Committee, with the Risk Management Division serving as the secretariat, is responsible for deliberation and decision making on the basic framework for overall credit risk management, including the Internal Rating System, self-assessment, economic capital management and credit ceiling for credit overconcentration risk. Each the Portfolio Management Committee and the Food and Agri Finance Committee, with the Financial Planning & Control Division and the Risk Management Division serving as the secretariat respectively, formulates basic strategies and deliberates on the execution policies regarding loans and investments, and deliberates and decides on business strategies for important or large transactions. Moreover, the Credit Committee functions as a venue for deliberation and decision making of policies about how to deal with the obligations of borrowers whose financial condition has deteriorated.

The middle office monitors the credit risk portfolio status and other items. In addition, the status of credit risk management (such as market overview; important decisions made by the Credit Committee, the Portfolio Management Committee and the Food and Agri Finance Committee; overview of the credit risk portfolio; current approach to risk management) is regularly reported to the Board of Directors. The Legal Affairs and Compliance Division checks the appropriateness of business operations from the aspect of compliance by attending various meetings and, if finding any significant fact, reports that to an Audit & Supervisory Board Member.

Under the direction of the Board of Directors, the Internal Audit Division audits the operational status of such meetings and reports the results to the Board of Directors.

Overview of the Criteria for Write-Offs and Provisions to Reserves

■ Self-Assessment Based on Internal Rating

The Bank conducts self-assessment on a quarterly basis at the end of March, June, September and December.

The self-assessment process initially classifies debtors in line with the Bank's debtor ratings. There are five debtor classifications: standard, substandard, doubtful, debtors in default, and debtors in bankruptcy.

Subsequently, within each of these classifications, the credit for each individual debtor is classified into four categories (I, II, III and IV) according to its recoverability.

■ Write-Offs and Provisions to Reserves

Write-offs and provisions to reserves for possible loan losses are made according to the criteria set by the Bank for each debtor classification by self-assessment. For exposure to standard debtors and substandard debtors, the Bank makes provisions to general reserves for possible loan losses for each category of borrower based on the expected loss ratio, which is calculated mainly from the historical loss ratio, with additional consideration of risks that are configured based on future predictions. For substandard debtors with substantial exposure, provisions to specific reserves for possible loan losses are calculated by the Discounted Cash Flow (DCF) method on an individual basis. For exposure to doubtful debtors or lower, provisions to specific reserves for possible loan losses are made, or write-offs are performed, for the necessary amount classified as Category III and IV which are not recovered by collateral or guarantee.

Details on remaining debt and other items are described in the Notes to the Financial Statements.

On the other hand, the credit risk parameters used to calculate the capital adequacy ratio are different from the parameters used to calculate the general reserves for possible loan losses and are calculated based on a transition to the default (substandard debtors or below) under

Relationship among Internal Rating, Self-Assessment, and Exposure Requiring Mandatory Disclosure under the Norinchukin Bank Act and the Financial Revitalization Law

Internal Rating	Self-Assessment					Exposure Requiring Mandatory Disclosure under the Norinchukin Bank Act and the Financial Revitalization Law							
	Debtor Classification		Asset Category	Definition of Asset Category									
1-1 4 1-2 5 2 6 3 7	Standard		Category I		Debtors who maintain favorable operating conditions and have no particular financial difficulties. Internal ratings 1-1 to 4 are equivalent to investment grades of credit rating agencies.		Standard						
8-1 8-2 8-3 8-4	Substandard	Other substandard debtors		II		Debtors requiring close monitoring going forward		Special attention	Three-Month Delinquent Claims				
Debtors under requirement of control		Restructured Loans											
9	Doubtful			III		Debtors who are highly likely to fall into bankruptcy					Doubtful		
10-1	Debtors in default				IV		Debtor who have effectively fallen into bankruptcy, although no facts have emerged to indicate legal or formal bankruptcy					Bankrupt or de facto bankrupt	
10-2	Debtors in bankruptcy						Debtors who are legally and formally bankrupt						

the Internal Rating System. Among the credit risk parameters, the Probability of Default (PD) is estimated by the Bank based on historical default ratios corresponding to the internal ratings, whereas the Loss Given Default (LGD) is estimated by the Bank based on internal loss data after default. For the Exposure at Default (EAD), the value specified in the Notification Regarding Capital Adequacy Ratio is used.

■ Exposure Subject to Standardized Approach

For the assets listed below, the Bank applies the Standardized Approach.

- Equity Exposure
- The on-balance sheet assets and off-balance sheet items of the Bank's consolidated subsidiaries, with the exception of IRB approach-applied subsidiaries.
- The following assets held by the Bank and IRB approach-applied subsidiaries: Suspense payments (with the exception of the account for securities), prepaid expenses, foreign currency forward contracts for foreign currency deposits of cooperative organizations, current account overdrafts (to holders of the Bank's

debentures) and off-balance-sheet assets (the portion of reverse mortgages that the Bank guaranteed to pay).

The Bank applies the standardized approach to ratings of five qualified credit rating agencies (External Credit Assessment Institution (ECAI)) in computing its risk assets, namely S&P Global Ratings, Moody's Investors Service, Fitch Ratings, Rating & Investment Information and Japan Credit Rating Agency. In addition, to judge the appropriate risk weighting in line with the actual credit situation, we use country risk scores of the Organisation for Economic Co-operation and Development (OECD) and Nippon Export and Investment Insurance (NEXI).

Exposure Subject to the Internal Ratings-Based Approach

■ Scope of Internal Ratings-Based (IRB) Approach

The Bank adopts the IRB Approach in computing credit risk assets. The scope of application of the IRB Approach includes all exposures, in principle, excluding equity exposure.

However, insignificant business units and asset cate-

gories in computing the amount of credit risk assets are excluded from the application of the IRB Approach, and the Standardized Approach is applied. Whether to apply the Standardized Approach is decided on consideration of the qualitative aspect of credit business, among other factors, in addition to the quantitative requirements specified in the Notification.

Outline of the Internal Rating System

The Internal Rating System is introduced and operated as a crucial tool to ensure a good balance between active risk taking and keeping the credit risk amount under control within the limits of the Bank's financial strength such as capital under appropriate risk management.

Types of Exposure by Portfolio and Overview of Internal Rating Procedures

■ Corporate, Sovereign and Bank Exposure

Types of Exposure

The types of corporate exposure include general business corporate exposure, bank exposure, sovereign (country) exposure and specialized lending exposure.

Within these categories, general business corporate exposure is subdivided into resident and non-resident corporate, depending on head office location. Specialized lending is subdivided into Income-Producing Real Estate (IPRE), High-Volatility Commercial Real Estate (HVCRE), Object Finance (OF) and Project Finance (PF).

Overview of Debtor Rating Procedure

In the Bank's general procedure for assigning a debtor rating for corporate, sovereign and bank exposure, the front office is in charge of applying for a rating and then the credit risk management section reviews and approves it. Moreover, the debtor rating is reviewed at least once a year. In addition, when an event occurs that could cause a change in the rating, the Bank conducts an "ad-hoc review."

Overview of Loan Recovery Rating Procedures

At the Bank, a loan recovery rating is assigned to each transaction with corporate, sovereign and bank exposure according to the conservation status of the collateral.

Moreover, the loan recovery rating is reviewed on a

quarterly basis.

■ Retail Exposure

Retail exposures, such as retail exposure secured by residential retail properties, qualifying revolving retail exposure and other retail exposures, are managed by grouping individual exposures into eligible retail pools the Bank stipulates and assigning ratings at the pool level.

Parameter Estimates and Validation Framework

■ Corporate, Sovereign and Bank Exposures

• PD

For the Probability of Default (PD) for corporate, sovereign and bank exposures, the Bank uses internal estimates corresponding to the debtor rating grades for four categories—resident corporate, non-resident corporate, bank and sovereign.

Among the above exposures, the resident corporate uses default data by the Bank's internal rating, whereas the non-resident corporate, bank and sovereign categories use default data by external ratings mapped to the internal rating grades to calculate long-term average default ratios corresponding to the debtor rating grades, to which the correction and capital floors stipulated in the Notification Regarding Capital Adequacy Ratio are applied to estimate the PDs.

For the bank and sovereign exposures, which are low default portfolios (LDPs), it is difficult to make consistent PD estimates from long-term average default data, which is the case with general corporate exposures. Therefore, after estimating the rating transition matrix, the probability of default that could occur after several years' rating transitions is calculated to estimate the PDs. In addition, a floor is applied to the upper ratings with the default ratio being below the floor level, among the resident corporate, non-resident corporate and bank exposures, thereby raising the PDs.

For the PDs applied in calculating the capital adequacy ratio, more conservative PDs are applied, compared to the long-term average default ratios to ensure stable management. To confirm the validity and conservativeness of the PDs, benchmarking and validation of the assumptions underlying the PD estimation method are conducted.

• LGD

For the Loss Given Default (LGD) for the Bank's general business corporate exposure, internal estimates corresponding to the loan recovery ratings are used.

LGDs are estimated by formulating the long-term average loss ratio and the collateral coverage ratio based on internal loss data after default and reflecting various correction requirements. In particular, a correction concerning the economic slowdown period is measured by applying a certain amount of stress through yearly regression using the average loss ratio and macroeconomic indicators.

For bank and sovereign exposures, which are low-default portfolios, the Bank's internal estimates are not used.

For the LGDs applied in calculating the capital adequacy ratio, validation using back-testing and other methods, based on internal loss data; benchmarking; and validation of the assumptions underlying the LGD estimation method are conducted to confirm the validity and conservativeness of the LGDs.

Although the length of time from default to the liquidation (conclusion) of exposures varies to a certain degree according to the reasons for the liquidation of each individual exposure, the average length of such a period has stayed about the same. Therefore, the average period of conclusion is set and used to estimate the LGDs.

• EAD

For the Exposure at Default (EAD) relating to corporate, sovereign and bank exposures, the Bank's internal estimates are not used.

■ Retail Exposure

For the Probability of Default (PD) and the Loss Given Default (LGD) for the Bank's retail exposures, internal estimates are used for each pool level classified by the characteristics of exposure and the status of credit risk.

The PDs are estimated by calculating long-term average default ratios based on historical default data for each pool level and applying the correction and capital floor stipulated in the Notification Regarding Capital Adequacy Ratio. To confirm the validity and conservativeness of the PDs, benchmarking and validation concerning the years elapsed and the effect during the year of execution are conducted, in addition to back-testing using default data for each pool level.

The LGDs are estimated for each pool level by calculating the loss ratio based on the loss data after defaults occurring in the past and reflecting various corrections. Regarding a correction factor concerning the economic slowdown, changes in the value of collateral occurred during a certain economic cycle and its loss ratio are reflected in the LGDs.

As to the periods from the time of default to the liquidation (conclusion) of exposures, setting the period from the occurrence of the default until confirming the loss or the period until an upgrade to a non-default rating at the concluding (liquidating) side, whereas the period until the end of the applicable fiscal year at the nonconcluding side, such set periods are used to estimate the LGDs.

The applicable EAD is the end-of-period balance, since the Bank has no exposure for revolving products, with which balances may be changed within the predetermined credit lines at the discretions of the obligors.

■ Framework for the Implementation of the Internal Rating System as Well as the Development and Management of Models Used

At the Bank, the middle office, which is independent of the front office, designs the Internal Rating System based on the characteristics of the credit portfolio and establishes rules concerning the internal rating objectives, each rating grade criteria, evaluation methods and mapping criteria, approval authority, and review and validation of rating. Validation and monitoring of the Internal Rating System to ensure appropriate implementation is performed on a regular basis.

The middle office conducts validation, monitoring and implementation of the internal rating framework, and engages in the development of models as well. The Credit Risk Management Division handles the implementation of models, whereas the Risk Management Division conducts validation thereof and formulates a model maintenance plan, considering opinions from the related Departments, which is to be decided at the Risk Management Committee after discussion at model subcommittee.

The design, implementation and validation of the Internal Rating System as well as the formulation of model maintenance plans are audited by the Internal Audit Division independent of the Risk Management Division.

Credit Risk Mitigation Techniques

Overview of Risk Characteristics, Risk Management Policies, Procedures and Framework Related to Credit Risk Mitigation Techniques

■ Overview

Credit Risk Mitigation (CRM) Techniques refer to the method to reduce the amounts of credit risk assets by using collateral, guarantees or other means for the recovery of claims. The Bank adjusts the amounts of credit risk assets using eligible financial collateral, guarantees or other means in accordance with the Notification Regarding Capital Adequacy Ratio.

A major eligible type of financial collateral is securities. For securities with market value such as listed stocks, a decline in market value means a reduction in the recoverable amount. The recovery effect is not recognized for stocks of the parent company.

Regarding guarantees, the types of guarantors in such transactions are mainly sovereigns, including central and local governments, financial institutions and corporates. To evaluate the creditworthiness of a guarantor, in principle, the Bank evaluates the entity's financial soundness as a guarantor after assigning a debtor rating and assessing the guarantor's creditworthiness. The effectiveness of CRM is not recognized if the debtor rating of a guarantor declines and falls below that of a guarantee.

To recognize the effectiveness of CRM using collateral and a guarantee, the legal effectiveness and appropriate assessment of the collateral and guarantee are important. Concerning the adequacy of collateral and guarantees, the front office and the Risk Management Division maintain their legal effectiveness and ensure their recoverability, and regularly confirm the marketability (liquidity) of collateral through timely and appropriate assessments.

■ Remarks on Policies for the Use of Netting and Basic Features of the Process and the Usage Status of Netting

For eligible financial collateral (excluding repo-type transactions and secured derivative transactions), the effectiveness of CRM can be recognized if it satisfies the relevant requirements stipulated in the Notification Regarding Capital Adequacy Ratio. The Bank recognizes

the effectiveness of CRM only for deposits with the Bank (including Norinchukin Bank Debentures) or stocks, etc. For deposits held with the Bank that are not pledged as collateral, if the requirements stipulated in the Notification Regarding Capital Adequacy Ratio are met, the Bank considers the effects of CRM by offsetting deposits and loans.

For the application of netting, the Bank specifies detailed procedures in its internal rules, confirms legal efficacy at the time of a collateral pledge and periodically confirms and reevaluates whether the function of protection from credit risks is maintained. To calculate the effectiveness of CRM, the amount of eligible financial collateral is used with consideration of the standard volatility adjustment ratios.

■ Basic Features of Evaluation of Collateral and Collateral Administrative Policies and Processes

The Bank regards future cash flows generated from the businesses of debtors as funds for recovery of its claims. Collateral is viewed as supplementary for the recovery of its claims. The Bank applies a collateral evaluation method to ensure that the amount recovered from collateral is not less than the assessed value of the collateral, even in the case that it becomes necessary to recover claims from collateral.

Specifically, the Bank values collateral based on objective evidence such as appraisals, official land valuations for inheritance tax purposes, and market value. Further, it has established detailed valuation procedures that make up its internal rules. In addition, the procedures stipulate the frequency of valuation reviews according to collateral type and the creditworthiness of debtors, which routinely reflects changes in value. The Bank conducts verification whenever possible, even when setting policies for debtors and during self-assessment. The Bank also estimates the recoverable amount by multiplying the weighing factor based on collateral type, and then uses that estimate as a secured amount for the depreciation allowance.

As a part of collateral management, the Bank stipulates the procedures of reviewing the legal efficacy and enforceability of collateral not only at the time of the collateral pledge but also periodically through the term of contract.

■ Remarks on the Status of Market Risk or Credit Risk Concentrations Arising from the Application of CRM Techniques

For exposures where the credit risk of guaranteed exposure is being transferred from a guaranteed party to a

guarantor as a result of CRM techniques, the Bank monitors the concentrations of credit risk, and manages the exposures accordingly. Regarding market risk, there is no exposure of credit derivatives in the Bank's trading accounts.

Counterparty Credit Risk in Derivative Transactions

Overview of Risk Characteristics and Risk Management Policies, Procedures and Framework for Counterparty Credit Risk in Derivatives and Repo-Type Transactions

■ Policies for Allocation of Risk Capital and Credit Ceiling Concerning Exposures to Counterparties and CCP

The Bank manages credit risk involving derivative transactions with financial institutions within the risk limits (Bank Ceiling) established in each group financial institution. A Bank Ceiling is established for each front section on the basis of each entity within the group and each type of transaction (derivatives, financial transactions, loans, etc.). Credit exposures related to derivative transactions are managed so as not to exceed the limits. Under the Bank Ceiling system, the exposure of derivatives that are to be managed is calculated utilizing the SA-CCR method (the replacement cost (mark-to-market) of the transaction plus an add-on deemed to reflect the potential future exposure).

■ Assessment on Collateral, Guarantee, Netting and Other Credit Risk Mitigation (CRM) Techniques and Overview of Management Policies and Disposal Procedures for Collateral, etc.

For derivative transactions, the Bank has concluded a CSA contract with major counterparties. In some cases, the Bank receives collateral from these counterparties. The collateral posted may vary depending on the terms of the CSA contract, but mainly it consists of Japanese government bonds (JGBs), Japanese yen cash, U.S. Treasury bonds, and U.S. dollar cash. If the counterparty

is not a core company of the group it belongs to, the Bank concludes a guarantee agreement with the core company of the group.

The Bank considers legally binding bilateral netting contracts for derivatives subject to netting in the ISDA Master Agreement as a means of CRM. Legally binding netting contracts are managed by verifying the necessity of the contract itself and scope of transactions on a regular and as-needed basis.

Regarding repo transactions, etc., in some cases, the Bank receives collateral such as various types of bonds, depending on the agreements that are concluded with its major counterparties.

The effectiveness of CRM techniques in these transactions is evaluated by the appropriate transaction unit. In case the amounts of collateral, etc., received are insufficient, according to the details of the agreement, the Bank receives additional collateral, thereby managing collateral, etc. In addition, in case of the disposal of collateral, such is executed based on the specifics of the agreement with each counterparty.

■ Policies for Recognition, Monitoring and Management of Wrong-Way Risk

"Wrong-way risk" refers to a risk of an increase in loss through interaction with the counterparty, which occurs in case the exposure of derivative transactions to the counterparty is adversely co-dependent with the credit quality of that counterparty.

Regarding risks related to financial institutions, which account for a majority of counterparty credit risks, the Bank conducts appropriate management of such risks including a wrong-way risk, by establishing credit limits for each financial institution based on the Bank Ceiling system and via monitoring on a daily basis.

■ Remarks on Impact in Case the Bank is Required to Post Additional Collateral when its Credit Standing Deteriorates

If the Bank's credit rating is downgraded, the Bank's financial institution counterparty will reduce its credit risk limit and may demand the Bank to post collateral.

However, the Bank has a sufficiently high level of liquid assets, such as government bonds that can be used as collateral, and the amount of those assets is periodically checked by the Portfolio Management Committee. For this reason, even if the Bank is required to post additional collateral, the impact on the Bank will be minimal.

Securitization Exposure

Overview of Risk Characteristics, Risk Management Policies, Procedures and Framework Related to Securitization Exposure

From the standpoint of globally diversified investments, the Bank invests in securitized (structured finance) transactions. Securitized exposure is a tool enabling the Bank to effectively and efficiently mitigate and acquire credit risk and other forms of risk of underlying assets. The Bank's policy is to continuously utilize securitized transactions while managing the risk arising from those transactions appropriately. The Bank does not plan to conduct securitized transactions in trading accounts.

Securitization exposure is managed mainly by operating the following cycle: After a management framework and an investment policy for each asset class are determined by the four committees consisting of the management—the Risk Management Committee, the Credit Committee, the Portfolio Management Committee and the Food and Agri Finance Committee—the front office executes the transaction through individual analysis during initial investment research (due diligence) and credit screening. The middle office, which is independent of the front office, reports the status of the credit risk portfolio and other related matters to the committees for further review of the management framework, leading to planning and formulation of an investment policy.

During individual analysis, in general, because of complex investment structures with different risk-return profiles than the underlying assets, after identifying items of due diligence and monitoring of each asset class as well as securitization and re-securitization, the Bank carefully examines risk in underlying assets and structure and conducts quantitative analysis of repayment capacity.

After investment, the Bank monitors the credit condition, including underlying asset performance of each project, and analyzes and assesses the market environment taking into account underlying asset trends of each asset class. In the event of credit deterioration, etc., is being seen, a framework of risk management is created including revising investment and holding policies.

The Bank appropriately monitors and verifies the status of its compliance with the regulations regarding risk retention and other details for each project at the time of investment and during the fiscal year.

The securitization exposure which contains securitization exposure as an underlying asset is called re-securitization exposure. Among the re-securitization exposures, wherein the majority of underlying assets are comprised of securitization exposures, the Bank treats them as secondary and tertiary re-securitization exposures and manages them separately from other re-securitization exposures to ensure appropriate management. The Bank does not plan to acquire new secondary or tertiary re-securitization exposures.

For securitization transactions, as described above, the Bank has been mainly involved as an investor, and also involved in arranging securitization and liquidity schemes such as using loan debt as the Group. As of March 31, 2024, the Bank engaged in no securitization transactions in which the Bank acted as an originator and recognized regulatory risk asset mitigation effects. In addition, the Bank's subsidiaries (excluding consolidated subsidiaries) or affiliates have no securitization exposure involving securitization transactions performed by the Bank in fiscal 2023.

As of March 31, 2024, the Bank had not provided credit support, etc., other than contracts.

Accounting Policies for Securitization Exposure

The Bank treats securitized instruments in accordance with the “Accounting Standard for Financial Instruments” (ASBJ Statement No. 10) and “Practical Guidelines on Accounting Standards for Financial Instruments” (JICPA Laws and Regulations Committee Report No. 14) for accounting purposes.

For securitization exposures to which RBA is applied, the Bank relies on the following five qualified credit rating agencies: S&P Global Ratings, Moody’s Investors Service, Fitch Ratings, Rating & Investment Information and Japan Credit Rating Agency.

The Bank does not use the “Internal Assessment Approach (IAA).”

Credit Valuation Adjustment (CVA)

Calculation of CVA Risk Equivalent

■ Approach for calculating the amount of CVA risk equivalent and overview of the subject transactions

The CVA risk equivalent is the amount of capital charges for market-price fluctuations of derivatives transaction due to deteriorated creditworthiness of a counterparty.

The Bank uses the reduced basic approach for calculation of the CVA risk equivalent (BA-CVA).

CVA risk at the Bank could arise from derivative transactions that are used to hedge interest rate and foreign exchange risks, etc. However, because the Bank secures collateral on its major derivative transactions, its CVA risk is limited and not hedged.

Market Risk

Market Risk Management Policies, Procedures and Framework

The Bank regards the transactions aimed at generating profits by taking advantage of short-term fluctuations in market prices and prices or other gaps between markets, such as a specified transaction account, as trading transactions, and assigns them to the trading book. From among the instruments to be assigned to the trading book, such as listed equities and fund investments, the Bank assigns those held for managing a portfolio of investments and loans to achieve stable returns over the medium to long term under the basic concept of “international diversified investment” to the banking book upon prior notification to the regulatory authorities of Japan.

The front office in charge of executing trading transactions is organizationally separated from other sections

handling other transactions. The front office executes trades within the approved position and loss limits predetermined from a risk-return perspective. The middle office, which is independent of the front office, measures the risk amounts including VaR and monitors the status of risk taking by the front office and the market liquidity of the instruments it handles. The results of such monitoring are regularly reported to the Portfolio Management Committee and other meetings.

Regarding the measurement of market risk equivalent, the Bank applies the standardized approach to all instruments assigned to the trading book and the foreign exchange and commodity risks associated with the banking book instruments. We do not conduct transfers of instruments between the trading and banking books and internal risk transfers.

Operational Risk

Overview of Risk Management Policies and Procedures Related to Operational Risk

■ Operational Risk Management

For operational risk management, the Bank has established its basic policies including definitions of the risk, management framework and management processes, which have been approved by the Board of Directors.

■ Definition of Operational Risk

The Bank defines operational risk as a risk that arises during business operations, other than market risk, credit risk, liquidity risk and model risk. Operational risk is further broken down into subcategories, such as processing risk, IT systems risk, legal risk, personnel risk, tangible assets risk, information security risk, business continuity risk, reputational risk and regulatory risk.

■ Basic Approach of Operational Risk Management

The Bank has established policies and procedures to manage and control individual operational risks such as processing risk, IT systems risk, legal risk, personnel risk, tangible assets risk and information security risk, for which the Bank's key management strategy is the prevention of risk event occurrence. The Bank also employs the following common risk management methods in order to identify, analyze, assess, manage and mitigate risks effectively: the operational risk reporting system for collection and analysis of risk events which have come to light, as well as Risk & Control Self-Assessment (RCSA) system for the evaluation of potential risks. To counter business continuity risk, for which the Bank's key management strategy is the mitigation of the impact and effect of risk events following their occurrence, the Bank has established the Regulations for Risk Management and other rules to address the situation after occurrence of a disaster and countermeasures to take when a disaster is predicted to occur. In addition, the Bank has worked to verify and enhance the effectiveness of its business continuity framework through regular drills.

Risks other than the above, such as reputational risk and regulatory risk, are defined as risks which should be dealt in accordance with the Bank's business judgment. The Bank strives to take proactive action in order to

prevent the occurrence of risk events while continuously monitoring these risks for signs of changes, and endeavors to incorporate those changes in the Bank's management strategy.

The Bank's current status in operational risk management is reported to the Operational Risk Management Committee and the Board of Directors periodically, and the basic policies for operational risk management are reviewed based on these reports when necessary. In addition, the overall operational risk management framework is subject to thorough review by the Internal Audit Division on a regular basis, in order to continuously improve its effectiveness.

Calculation of Business Indicator

Business Indicator (BI) is calculated by adding Interest, Lease and Dividend Component (ILDC), Services Component (SC) and Financial Component (FC) in accordance with the Notification Regarding Capital Adequacy Ratio, Article 282.

Calculation of Internal Loss Multiplier (ILM)

For Internal Loss Multiplier (ILM), the Bank adopts the method stipulated in the Notification Regarding Capital Adequacy Ratio, Article 283, Paragraph 1-1, provided that it adopts the method using conservative estimates stipulated in Article 283, Paragraph 1-4 of said Notification for its consolidated subsidiaries not meeting the standards defined in Article 287-1 of said Notification, such as those not holding data on internal loss for the past 10 years.

Business Units Excluded from the Calculation of BI for Calculating the Amount Equivalent to Operational Risk

Equity Exposure

Overview of Risk Characteristics, Risk Management Policies, Procedures and Framework Related to Equity Exposure

■ Framework for Correct Recognition, Evaluation, Measurement and Reporting of Risks

Risk measurements are conducted by the middle office, which is independent of the front office. The Bank's exposure to equity comprises stocks classified as other securities and stocks of subsidiaries and affiliates. The amount of risk-weighted asset for credit risk is computed by the methods specified by the Notification Regarding Capital Adequacy Ratio. For internal management purposes, the Bank conducts comprehensive risk management within its economic capital management framework.

■ Risk Management Policies for Other Securities and Stocks of Subsidiaries and Affiliates by Category

Risk management of equities classified as other securities is managed under a framework of market risk management (including interest rate risk and foreign currency exchange risk). That framework mainly consists of

the economic capital management framework. Concerning the stocks of subsidiaries and affiliates, such are recognized as credit risk assets and managed within the economic capital management framework.

■ Principal Accounting Policies for Exposures Including Evaluation of Exposure to Equity and Other Investments (Including the items in line with Article 8, Paragraph 3, of the "Ordinance on Terminology, Forms and Preparation Methods of Financial Statement" in case the accounting policies are changed)

For accounting purposes, among exposure to equity and other investments, stocks of subsidiaries and affiliates are valued at cost, determined by the moving average method. Exposure to equity and other investments classified in other securities is valued at the market value prevailing on the date of the closing of accounts, in the case of equities with quoted market values (with book values mainly determined by the moving average method). Stocks and others with no market prices are valued at cost, determined by the moving average method. In addition, the valuation difference on other securities is entered directly in the net assets account.

Exposure Subject to Risk-Weighted Asset Calculation for Investment Funds —

Overview of Risk Management Policies and Procedures Related to Exposure Subject to Risk-Weighted Asset Calculation for Investment Funds

Exposure subject to risk-weighted asset calculation for investment funds consists mainly of assets managed in investment trusts and money trusts. Assets under management include equities, bonds and credit assets, which are the Bank's primary investment assets. Risk management policies are stipulated for each of the asset's risk. An outline is provided in the section "Risk Management." In addition to assets managed by the Bank itself, the Bank utilizes investment funds in which asset man-

agement is entrusted to management firms. Risk is managed by applying methods appropriate for each type of fund in accordance with the Bank's internal rules. In order to select managers and entrust assets with them, the Bank performs thorough due diligence on the manager's ability, including operating organization, risk management, compliance framework, management philosophy and strategies, as well as past performance. In addition, during entrusting assets to managers, the Bank monitors their performance from quantitative and qualitative perspectives and conducts reviews of performance on a regular basis to assess whether to maintain or replace individual managers.

Interest Rate Risk

Overview of Risk Management Policies and Procedures Related to Interest Rate Risk

The core concept of the Bank's portfolio management is "globally diversified investment." Based on the concept, the Bank aims to build a sound and profitable portfolio with bonds (interest rate), stocks, and credit assets as major asset classes. In constructing the portfolio, the Bank controls the income and risk from each of these assets within the limits of the Bank's capital, taking into account the correlation among asset classes and other factors.

Therefore, the Bank deems market risk, such as interest rate risk and the risk of stock price volatility, to be a significant risk factor affecting the Bank's earnings base. Through active and appropriate risk-taking supported by a robust risk management framework, the Bank aims to retain a stable level of profit. The Bank also utilizes hedge transactions such as derivatives from a perspective of controlling market risks including interest rate risk and maintaining such risks at an adequate level.

For risk management, from the perspective of controlling market risks including interest rate risk and credit risk, etc., while keeping an appropriate risk balance, so that such risks are kept within a range of its capital-based financial strength, the Bank has established capital management checkpoints. For monitoring, Δ EVE is measured on a daily basis as a general rule to grasp the impact of interest rate fluctuations on current market values and NII and Δ NII to grasp the impact of interest rate fluctuations on the level of earnings. Such data are reported to the management of the Bank.

In addition to the above, the Bank conducts periodic stress tests, etc., to perform profit-and-loss simulation analyses under a wide range of scenarios, such as a scenario in which interest rates rise and fall based on a dynamic portfolio. Furthermore, the Bank has established a framework to properly monitor the multifaceted effects of interest rate risk, including various interest rate sensitivity analyses, such as BPV and yield-curve risk, and static and dynamic revenue and expenditure impact analyses by major currencies.

The Bank applies the deferral method of hedge accounting to the hedge transactions to manage interest rate risk associated with various financial assets and liabilities, which is described in "Accounting and

Auditing Treatment relating to the Adoption of the 'Accounting for Financial Instruments' for Banks," issued by the Japanese Institute of Certified Public Accountants ("JICPA"), (JICPA Industry Committee Practical Guideline No. 24, issued on March 17, 2022). Hedge effectiveness of a fair value hedge is assessed by identified groups of hedged items, such as loans and deposits, and the corresponding groups of hedging instruments, such as interest rate swaps within the same maturity bucket. Hedge effectiveness of a cash flow hedge is assessed based on the correlation of the interest rate risk indicators of the hedged items and that of the hedging instruments.

Overview of Interest Rate Risk Calculation Methods

■ Average/longest maturity for a revision of the interest rate allotted to liquid deposits

For deposits without a contractual maturity that the Bank accepts, without applying an internal model, such are instead evaluated as overnight deposits to measure their interest rate risks.

■ Assumptions related to early repayment, etc., before the loan maturity

To evaluate mortgage-backed bonds and housing loans, related interest rate risks are measured, taking potential early repayments into account. In such measurements, the midterm cancellation ratio is estimated by a statistical analysis based on the interest rate situation and the historical repayment and cancellation data.

■ Method to tabulate multiple different currencies and the underlying assumption

Regarding the Economic Value of Equity (Δ EVE), from the perspective of consistency with economic capital management, by estimating a correlation structure among different currencies based on historical interest rate fluctuations, Δ EVE is tabulated for multiple currencies using a method similar to a variance-covariance method, taking the variance effect into account. In case currencies with losses occurred and currencies with profits generated both existed in specific scenarios, from

the perspective of carefully estimating the offsetting effect between currencies with profits and currencies with losses, after factoring in the cross-currency offsetting effect into the analysis of the profit-generating currencies, the Δ EVE of currencies with gains and that of currencies with losses are summed and tabulated.

Concerning Net Interest Income (Δ NII), the Δ NII among different currencies is simply summed.

■ Assumptions regarding the spread (whether to include in the discount interest and/or cash flow, etc., at the time of calculation)

Discounted interest rates are established, considering the appropriate spread for each product. Such spread is set as invariable despite interest rate shocks.

■ Other assumptions that pose serious impact on Δ EVE and/or Δ NII such as utilization of internal models

Most time deposits with the Bank are cooperative deposits from JA and JA Shinnoren. Cooperative deposits are time deposits that are continually deposited by JA and JA Shinnoren based on the JA Bank Basic Policy from the perspective of safe and efficient management by the entire JA Bank. A source of part of such time deposits is the liquid deposits received by JA and JA Shinnoren from their individual customers.

Therefore, of the cooperative deposits, regarding the balance of liquid deposits that JA and JA Shinnoren receive from their individual customers, statistical analysis is conducted, and projected interest rate, Japan's population dynamics and the trend of deposits and savings are analyzed. Then, maturity—with the average maturity for revision of the interest rate being 4.1 years and the longest maturity for revising the interest rate being 10 years—is allotted to each such deposit (core deposit) to recognize the interest rate risks in terms of the Δ EVE and Δ NII, assuming the average maturity of cooperative deposits is 1.7 years.

	Directly issued qualifying common share capital plus related capital surplus and retained earnings	6,217,826	6,218,288	Directly issued qualifying common share capital plus related capital surplus and retained earnings (before adjusting cash dividends to be paid)
1a	Of which: capital and capital surplus	4,063,598	4,063,598	
2	Of which: retained earnings	2,154,228	2,154,690	
	Of which: other than the above	—	—	
31a	Directly issued qualifying Additional Tier 1 instruments plus related capital surplus of which: classified as equity under applicable accounting standards and the breakdown	—	—	

2. Intangible Assets

(1) Consolidated Balance Sheet

(Millions of Yen)				
Reference numbers	Consolidated balance sheet items	As of March 31, 2024	As of March 31, 2023	Remarks
2-a	Intangible fixed assets	54,228	51,669	
2-b	Securities	43,800,270	39,725,740	
	Of which: goodwill attributable to equity-method investees	2,417	2,853	
	Income taxes related to above	—	(13,222)	

(2) Composition of Capital

(Millions of Yen)

Basel III Template No.	Composition of capital disclosure	As of March 31, 2024	As of March 31, 2023	Remarks
8	Intangible assets: goodwill	2,417	2,853	
9	Intangible assets: other	54,228	38,446	Other intangible assets other than goodwill and mortgage servicing rights
	Intangible assets: mortgage servicing rights	—	—	
20	Amount exceeding the 10% threshold on specified items	—	—	
24	Amount exceeding the 15% threshold on specified items	—	—	
74	Mortgage servicing rights that are below the thresholds for deduction (before risk weighting)	—	—	

3. Net Defined-benefit Asset

(1) Consolidated Balance Sheet

(Millions of Yen)

Reference numbers	Consolidated balance sheet items	As of March 31, 2024	As of March 31, 2023	Remarks
3	Net defined-benefit asset	41,456	129,465	
	Income taxes related to above	—	(35,926)	

(2) Composition of Capital

(Millions of Yen)

Basel III Template No.	Composition of capital disclosure	As of March 31, 2024	As of March 31, 2023	Remarks
15	Net defined-benefit asset	41,456	93,538	

4. Deferred Tax Assets

(1) Consolidated Balance Sheet

(Millions of Yen)

Reference numbers	Consolidated balance sheet items	As of March 31, 2024	As of March 31, 2023	Remarks
4-a	Deferred tax assets	3,731	307,942	
4-b	Deferred tax assets for land revaluation	1,600	1,600	
4-c	Deferred tax liabilities	6,328	—	
	Intangible assets to which tax-effect accounting was applied	—	13,222	
	Portion of net defined-benefit asset to which tax-effect accounting was applied	—	35,926	

(2) Composition of Capital

(Millions of Yen)

Basel III Template No.	Composition of capital disclosure	As of March 31, 2024	As of March 31, 2023	Remarks
10	Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability)	—	979	This item does not agree with the amount reported on the consolidated balance sheet due to offsetting of assets and liabilities.
	Deferred tax assets arising from temporary differences (net of related tax liability)	—	357,712	This item does not agree with the amount reported on the consolidated balance sheet due to offsetting of assets and liabilities.
21	Amount exceeding the 10% threshold on specified items	—	—	
25	Amount exceeding the 15% threshold on specified items	—	—	
75	Deferred tax assets arising from temporary differences that are below the thresholds for deduction (before risk weighting)	—	357,712	

5. Deferred Gains or Losses on Derivatives under Hedge Accounting

(1) Consolidated Balance Sheet

(Millions of Yen)

Reference numbers	Consolidated balance sheet items	As of March 31, 2024	As of March 31, 2023	Remarks
5	Net deferred losses on hedging instruments	(6,504)	77,079	

(2) Composition of Capital

(Millions of Yen)

Basel III Template No.	Composition of capital disclosure	As of March 31, 2024	As of March 31, 2023	Remarks
11	Deferred gains or losses on derivatives under hedge accounting	(23,642)	64,902	Excluding those items whose valuation differences arising from hedged items are recognized as “Accumulated other comprehensive income”

6. Items Associated with Investments in the Capital of Financial Institutions

(1) Consolidated Balance Sheet

(Millions of Yen)

Reference numbers	Consolidated balance sheet items	As of March 31, 2024	As of March 31, 2023	Remarks

Notes: 1. (a) and (b) are combined because the accounting scope of consolidation and the regulatory scope of consolidation under the capital ratio requirements are identical.

2. Repo-type transactions are classified into two categories of credit risk of securities and counterparty credit risk.

3. Of market risks, which include the foreign exchange risk of banking accounting, only the items in the trading account are posted.

LI2: Main sources of differences between regulatory exposure amounts and carrying values in financial statements

	7	B+	B1	B+	B+	B+	4.71%	4.79%	665	598	11	0	1.00%
	8-1 to 8-2	B—CCC-	B2—Caa3	B—CCC-	B—CCC-	B—CCC-	15.68%	15.83%	508	513	49	0	8.64%
Retail exposure	Standard loans						0.21%	0.24%	145,900	150,001	54	0	0.10%
	Delinquent loans						11.31%	14.08%	561	572	47	0	9.65%

- Notes: 1. Although most tallied data are about consolidated assets, in principle, as to the “Number of obligors,” “Defaulted obligors in the year” and “Average historical annual default rate (5 years)” of corporate, sovereign and bank exposure, only non-consolidated data are tallied, taking into account that the PDs are estimated mainly for the group of obligors of the Bank as a non-consolidated entity and a majority of such obligors are borrowers of the Bank alone on a non-consolidated basis.
2. Although the Bank has applied the Advanced Internal Ratings-Based Approach (A-IRB) to corporate, sovereign and bank exposure, beginning with the standard capital adequacy ratio calculation as of March 31, 2017, because the average PD and the average historical annual default rates, which are subject to back-testing, were calculated including the data prior to the transition to the A-IRB, the sum of the investment funds under the A-IRB and those under the Foundation Internal Ratings-Based Approach (F-IRB) were tallied and disclosed.
3. Back-testing is not applied to Specialized Lending Products because the slotting criteria method is adopted for them. Moreover, the data on equity exposure and debt purchased for corporate, for which the PD/LGD approaches are applied, are not tallied for each classification because the number of defaults is recognized in one of the above categories in case default occurs.
4. Retail exposure, the balance of which is insignificant against total assets, is disclosed as a whole in a single portfolio category.
5. Because related back-testing is conducted and tallied using the PD values used to calculate the capital adequacy ratio for estimation and validation, with the “previous year-end” for corporate, sovereign and bank exposure being September 30, 2022, and the “current year-end” as September 30, 2023, and with the “previous year-end” for retail exposure being the end of a reference month on an exposure pool basis in estimation and validation for 2022 and the “current year-end” being the end of the same reference month for 2023, the “Number of obligors” and “Defaulted obligors in the year” were tallied. Also, the “Weighted-average PD” and “Arithmetic average PD by obligors” are calculated, considering the purpose of this disclosure, using the PD values that were applied to compute the risk-weighted asset data used to calculate the capital adequacy ratio as of the reference date of March 31, 2023.
6. Concerning the “Average historical annual default rate (5 years),” the five-year average value is computed with the reference date of September 30 of each year for corporate exposure, and that for retail exposure with the reference date being the end of the reference month of each exposure pool for estimation and validation, using the internal past default data.
7. For retail exposure, calculation was conducted not by obligor but also by loan.

■ Establishment of the Debtor Rating System and Categories for Estimating PDs Related to Corporate, Sovereign and Bank Exposure

Portfolio	Evaluation methods for assigning debtor ratings	Category for estimating PDs	Ratio to the entire credit RWA
Sovereign exposure	Internal development methods Methods to refer to credit ratings by external agencies	Sovereign	0.67 %
Bank exposure	Internal development methods Methods to refer to credit ratings by external agencies	Bank	2.37 %
Corporate exposure (excluding Specialized Lending Products)	Internal development methods Methods to refer to credit ratings by external agencies Credit rating agencies estimating models approach	Resident corporate Non-resident corporate	15.21 %
Specialized Lending Products	Internal development methods	Not applicable because the slotting criteria method is applied	9.82 %
Other debt purchased for corporate, sovereign and bank exposure	Internal development methods Methods to refer to credit ratings by external agencies	Categorized as resident corporate, non-resident corporate, bank or sovereign	0.29 %

Note: The "Category for estimating PDs" are Resident corporate, Non-resident corporate, Bank and Sovereign under the Debtor Rating System. PDs are assigned corresponding to the debtor rankings in each category.

■ Remarks on the Evaluation Methods for Assigning Ratings to Corporate, Sovereign and Bank Exposure

Evaluation methods	Overview of the evaluation methods	Method to allocate exposures to the evaluation methods to be applied
Internal development methods	Evaluation method combining quantitative and qualitative methods, in principle, using a quantitative model	1. Allocation of ratings based on the quantitative financial information and qualitative information available via transactions mainly with credit risk in financing, etc. 2. Allocation of ratings to debtors of which evaluation by the internal development method is possible because there is a sufficient level of quality and quantity of information obtained from disclosure data and fund managers in case of investing in specific bonds and loans mainly with credit risk (including fund and other indirect investments)
Methods to refer to credit ratings by external agencies	Evaluation methods utilizing mainly S&P or Moody's credit rating information	Allocation of ratings to debtors of which rating information from external credit rating agencies is available Provided, however, the use of this method shall be limited to either of the following. 1. In case of investing in bonds or loans mainly with market risks such as price volatility and interest risk (including fund and other indirect investments) 2. In case of investing in credit risk-born funds, etc., with inferior quality and quantity of information on the investment targets constituting the fund available from disclosure data and fund managers compared to the information obtained on debtors to whom the Bank's internal development method is applied, thereby the alternative use of rating information from external credit rating agencies as major information rather than the use of the internal development method being judged to be more appropriate
Credit rating agencies estimating models approach	Evaluation method utilizing quantitative evaluation by a vendor model for estimating the external rating as major information	In case of investing in specific bonds and loans (including investment types commissioned to external firms) mainly with credit risk and allotment of ratings to debtors who satisfy both of the following: 1. In case it is impossible to obtain rating information by external credit rating agencies 2. In case the quality and quantity of information available from disclosure data and fund managers is inferior compared to that of debtors to whom internal development methods are applied, thereby the alternative use of quantitative evaluation by a vendor model of estimating external rating as major information rather than the use of internal development methods being judged to be more appropriate

■ Establishment of Pools Related to Retail Exposure

Portfolio	Pools		Ratio to the entire RWA
Retail exposure secured by residential properties	Cooperative mortgage loan	Mortgage loan that is not backed by a loan guarantee company, JA Bank mortgage loan guarantee	1.69%
Qualifying revolving retail exposure	—	—	—
Other debt purchased (retail)	Purchased mortgage loans, purchased personal loans	Purchased retail receivables	0.00%
Other retail exposure	Agricultural funds for individual agricultural business operators, forestry funds for individual forestry business operators, fishery funds for individual fishery business operators, educational loans in trust	Business loans not backed by a loan guarantee company, non-businesses loans not backed by a loan guarantee company, JA Bank unsecured loan guarantee	0.11%

■ Remarks on the Scope of Application of Retail Exposure Pools

Portfolio	Method to apply exposure pools
Retail exposure secured by residential properties	Credit of an individual who resides on the real estate owned by the Bank
Qualifying revolving retail exposures	Exposures with all the characteristics listed below 1. Exposure with the debt balance changeable depending on the debtor's arbitrary judgments within the upper limit stipulated in the contract, with no collateral, and no contract regarding the maintenance of credit lines, thereby allowing the Bank to cancel without cause 2. Exposure to individual person-related risks 3. The upper limit of the balance for an individual is ¥10 million or lower. 4. Low volatility in the loss ratio of low-PD exposures in the portfolio to which the exposure belongs 5. It is possible to verify the volatility rate using the loss ratio data of the exposure.
Other debt purchased (retail)	Loans for individuals purchased from outside the consolidated group of the Bank
Other retail exposure	Non-business loans for individuals that are not categorized in the above loans for individuals (e.g., educational funds, auto loans and funds for living) or business loans mainly by credit guarantee associations in the amount of less than ¥100 million after subtracting the portion of the guarantee

Exposure Subject to Risk-Weighted Asset Calculation for Investment Funds (Consolidated)

Amount of Exposure Subject to Risk-Weighted Asset Calculation for

Investment Fund

(Billions of Yen)

Items	As of March 31, 2024	As of March 31, 2023
	Exposure	Exposure
Look-through approach	184,834	166,540
Mandate-based approach	—	—
Simple approach (subject to 250% RW)	—	—
Simple approach (subject to 400% RW)	364	357
Fall-back approach (subject to 1250% RW)	607	705
Total	185,807	167,603

Notes: 1. The “Look-through approach” is a computation method if the exposure-related information on the underlying assets for the retained exposure meets all the following requirements. Using this approach, the credit risk asset amount of the retained exposure is calculated by multiplying the amount of the retained exposure by the ratio that is obtained by dividing “the total amount of credit risk-weighted assets including such underlying assets” by “the total amount of assets held by the business entity that actually holds such underlying assets.” (Please refer to Notification Regarding Capital Adequacy Ratio, Article 144-2.)

1. The information of assets have been acquired appropriately and frequently.

2. The related information has been inspected and verified by an independent third party.

2. The “Mandate-based approach” is a computation method used when credit risk asset amounts cannot be computed using the “Look-through approach.” If clarified asset management criteria are available, using this approach, the credit risk asset amount of the retained exposure is calculated by multiplying the amount of the retained exposure by the ratio that is obtained by dividing the “maximized total amount of the credit risk-weighted assets including the underlying assets for the retained exposure based on such asset management criteria” by “the total amount of assets held by the business entity that actually holds such underlying assets.” (Please refer to Notification Regarding Capital Adequacy Ratio, Article 144-7.)

3. The “Simple approach” is a computation method applied in the case the requirements for neither the “Look-through approach” nor the “Mandate-based approach” can be met. In this approach, if the purported risk weight of retained exposure is deemed to be highly probable at the probability level listed below based on the explanation and information provided, the purported risk weight is used to compute the credit risk asset amount of the retained exposure. (Please refer to Notification Regarding Capital Adequacy Ratio, Article 144-10.)

1. 250% or below: 250%

2. More than 250% and 400% or less: 400%

4. The “Fall-back approach (subject to 1250% RW)” is a method for computing credit risk asset amounts using 1250% risk weight in case none of the requirements of the “Look-through approach,” “Mandate-based approach” or “Simple approach” can be met. (Please refer to Notification Regarding Capital Adequacy Ratio, Article 144-11.)

Macprudential Supervisory Measures

CCyB1: Geographical distribution of credit exposures used in the countercyclical capital buffer

Fiscal 2023 (Ended March 31, 2024)

(Millions of Yen, %)

	a	b	c	d
Geographical breakdown	Countercyclical capital buffer rate	The amount obtained by adding the total amount of risk-weighted assets used in the computation of the countercyclical buffer and the total amount of market risk equivalent to default risk divided 8%	Bank-specific countercyclical capital buffer rate	Countercyclical buffer amount
Luxembourg	0.50%	156,868		
Hong Kong (China)	1.00%	58,041		
Sweden	2.00%	29,616		
U.K.	2.00%	1,154,955		
Australia	1.00%	686,964		
Germany	0.75%	191,114		
Netherlands	1.00%	501,748		
France	1.00%	329,929		
Subtotal		3,109,239		
Total		20,705,184	0.20%	52,948

Note: As to geographic allocation methods for the amounts of credit risk-weighted assets, the location of each project of direct investments or fund and securitization products with which the look-through of the underlying assets is possible is defined as the ultimate country bearing the risk. Regarding fund and securitization products with which it is difficult to "look-through" the underlying assets, the ultimate risk-bearing country is allocated based on the asset management criteria and other factors.

Fiscal 2022 (Ended March 31, 2023)

(Millions of Yen, %)

	a	b	c	d
Geographical breakdown	Countercyclical capital buffer rate	Risk-weighted assets used in the computation of the countercyclical buffer	Bank-specific countercyclical capital buffer rate	Countercyclical buffer amount
Luxembourg	0.50%	212,864

31a	Leverage ratio on a consolidated basis (including the deposits with the Bank of Japan) incorporating mean values from line 28 of the amount of assets related to SFTs ((e)/(l))	5.53%	6.93%

The Key drivers of material changes observed from the end of the previous reporting period to the end of the current reporting period

The key driver was a decrease in the amount of capital (Tier 1 capital) due to a decrease in Net Unrealized Gains on Other Securities from previous reporting period.

Sound Management of Liquidity Risk (Consolidated)

Qualitative Disclosure Items Concerning a Liquidity Coverage Ratio on a Consolidated Basis

Items concerning a change in the consolidated liquidity coverage ratio on a time-series basis

The consolidated liquidity coverage ratio has shown generally stable progress for the past two years.

Items concerning evaluation of the level of the consolidated liquidity coverage ratio

The consolidated liquidity coverage ratio has tended to be well above the required level.

The future consolidated liquidity coverage ratio is not predicted to differ substantially from the disclosed ratio.

The actual value of the consolidated liquidity coverage ratio does not differ substantially from the initial forecast.

Items concerning the details of the sum of high-quality liquid assets that can be included

In light of the Bank's consolidated liquidity coverage ratio, there is no material item.

Other items concerning the consolidated liquidity coverage ratio

The Bank has not adopted the "Special case related to qualifying operational deposits" and the "Additional amount of collateral required at the time of scenario approach-based changes in fair value."

Considering the impact on the Bank's consolidated liquidity coverage ratio, with regard to immaterial consolidated subsidiaries with restrictions on practical operation, it is possible that daily data are not used.

Qualitative Disclosure Items Concerning a Net Stable Funding Ratio on a Consolidated Basis

Items concerning a change in the consolidated net stable funding ratio on a time-series basis

The consolidated net stable funding ratio has shown stable progress since it was subject to the Basel standards in the second quarter of fiscal 2021.

Items concerning exceptional treatment regarding interdependent assets and liabilities

“Exceptional treatment regarding interdependent assets and liabilities” is not applied.

Other items concerning the consolidated net stable funding ratio

The consolidated net stable funding ratio has tended to be well above the required level.

The future consolidated net stable funding ratio is not predicted to differ substantially from the disclosed ratio.

The actual value of the consolidated net stable funding ratio does not differ substantially from the initial forecast.

Qualitative Disclosure Items Concerning a Liquidity Coverage Ratio on a Non-Consolidated Basis

Items concerning a change in the non-consolidated liquidity coverage ratio on a time-series basis

The non-consolidated liquidity coverage ratio has shown generally stable progress for the past two years.

Items concerning evaluation of the level of the non-consolidated liquidity coverage ratio

The non-consolidated liquidity coverage ratio has tended to be well above the required level.

The future non-consolidated liquidity coverage ratio is not predicted to differ substantially from the disclosed ratio.

The actual value of the non-consolidated liquidity coverage ratio does not differ substantially from the initial forecast.

Items concerning the details of the sum of high-quality liquid assets that can be included

In light of the Bank's non-consolidated liquidity coverage ratio, there is no material item.

Other items concerning the non-consolidated liquidity coverage ratio

The Bank has not adopted the "Special case related to qualifying operational deposits" and the "Additional amount of collateral required at the time of scenario approach-based changes in fair value."

Qualitative Disclosure Items Concerning a Net Stable Funding Ratio on a Non-Consolidated Basis

Items concerning a change in the non-consolidated net stable funding ratio on a time-series basis

The non-consolidated net stable funding ratio has shown stable progress since it was subject to the Basel standards in the second quarter of fiscal 2021.

Items concerning exceptional treatment regarding interdependent assets and liabilities

“Exceptional treatment regarding interdependent assets and liabilities” is not applied.

Other items concerning the non-consolidated net stable funding ratio

The non-consolidated net stable funding ratio has tended to be well above the required level.

The future non-consolidated net stable funding ratio is not predicted to differ substantially from the disclosed ratio.

The actual value of the non-consolidated net stable funding ratio does not differ substantially from the initial forecast.

Compensation

■ Compensation Structure Disclosure

The Bank has disclosed its compensation structure since March 2012 based on Notification No. 10 in 2012 of the Financial Services Agency and the Ministry of Agriculture, Forestry and Fisheries of Japan entitled “Matters set forth separately by the Minister of Agriculture, Forestry and

Fisheries of Japan and the Financial Services Agency Commissioner, based on Article 112-6 of the Ordinance for Enforcement of The Norinchukin Bank Act, Article 112-6 and Article 113-4 of said Ordinance” (hereinafter “Compensation Notification”).

1. Compensation Structure for the Subject Directors and Employees of the Bank

■ Definition of the Subject Directors and Employees

The scope of the Subject Directors and the Subject Employees stipulated in the Compensation Notification who are subject to compensation disclosure is described below.

● Definition of the Subject Directors

The Subject Directors are the Bank’s Board members and Audit & Supervisory Board members. The Supervisory Committee members and part-time Audit & Supervisory Board members are excluded from the scope.

● Definition of the Subject Employees

Among the Bank’s directors other than the Subject Directors, and the Bank’s employees, as well as the Bank’s major consolidated subsidiaries’ directors and employees, who are “Highly Compensated Persons” that exert a major material impact on the business operations or financial status of the Bank or its major subsidiaries are deemed the Subject Employees and are thereby subject to compensation disclosure.

Definition of Major Consolidated Subsidiaries

Major consolidated subsidiaries are the subsidiaries whose ratio of total assets to the Bank’s consolidated total assets is 2% or higher, and which have a material impact on the Group management. Specifically, Kyodo Housing Loan Co., Ltd. is such a subsidiary of the Bank.

Definition of Highly Compensated Persons

Highly Compensated Persons are those persons whose compensation is higher than the average for the Subject Directors (excluding those who retired during the period), calculated by dividing the total compensation described in the chart “REM1: Remuneration awarded during the financial year.” Regarding retirement lump sum payments, once the total retirement lump sum payment has been subtracted from the total compensation, the amount obtained by dividing the total lump sum payment by the number of years in office is then added to the remaining compensation amount. This amount is regarded as a person’s total compensation and becomes the basis of the judgment whether the person is a Highly Compensated Person.

Definition of Persons Who Exert a Material Impact on the Business Operations or Financial Status of the Group

Persons who Exert a Material Impact on the Business Operations or Financial Status of the Group are those persons whose ordinary transactions and areas of management exert a considerable influence on the business operations of the Bank, the Group and the major consolidated subsidiaries, or persons whose transactions exert a considerable influence on the financial status of the Group through the generation of losses.

■ Determining the Subject Directors and Employees' Compensation

● Determining the Subject Directors'

Regarding the Bank's compensation structure for directors, the Bank established the Director Compensation Deliberation Committee (the "Committee") to deliberate on compensation issues, as a subcommittee of the Supervisory Committee. The Committee deliberates on the Bank's director compensation standards and total compensation of those who are eligible to receive retirement benefit payments, as well as the standards for such payments. The Committee is composed of committee members (cooperative organization representatives and attorneys) commissioned by the Supervisory Committee, and the Chairman of the Committee is appointed by the Chairman of the Supervisory Committee from among those individuals with an in-depth knowledge of finance.

Based on the results of the Committee's discussions, proposals concerning total director compensation and retirement benefits are presented to the Supervisory Committee, and those proposals are finally discussed and decided at the Council of Delegates.

Within the limits of total compensation decided at the Council of Delegates, the compensation of directors is decided at the Board of Directors meeting and the compensation of Audit & Supervisory Board members is decided through Audit & Supervisory Board members consultation.

In addition, following a resolution at the Council of Delegates, the actual amount of retirement benefits is

decided at the Board of Directors meeting for Board members and through Audit & Supervisory Board members consultation for Audit & Supervisory Board members.

● Determining the Subject Employees' Compensation

Compensation for Subject Employees of the Bank are determined and paid based on a salary and bonus system enacted for the Bank and its major consolidated subsidiaries. Such system has been designed and documented by the Human Resources Division, etc. of the Bank and its major consolidated subsidiaries, that are independent from the business promotion divisions. Noted, the compensation system for overseas Subject Employees is determined by discussion with local offices and the Human Resources Division, etc. according to local laws and regulations as well as employment practices.

■ Total Compensation Paid to Director Compensation Deliberation Committee Members and Number of Times the Committee has Convened

The Committee was convened two times between April 2023 and March 2024.

Note: Of the Committee members, those who concurrently serve as a member of another committee such as the Supervisory Committee, the total compensation paid to them is not indicated because it is impossible to calculate the amounts of compensation for the execution only of this Committee separately. Regarding other members, because such disclosure would reveal each member's compensation, the total compensation paid is not indicated.

2. Matters Related to the Evaluation of the Appropriateness of the Design and Operation of the Bank's Compensation Structure for the Subject Directors and Employees, etc.

■ Compensation Policy

The Bank is a financial institution founded by agricultural, fishery and forestry workers' cooperative organizations based on The Norinchukin Bank Act. Through the provision of financial and various other functions for

these cooperative organizations, the Bank aims to contribute to the development of the agricultural, fishery and forestry industries and the nation's economy. To help the Bank realize this aim, the Bank has designed its director compensation system.

● Compensation Policy for the Subject Directors

The actual compensation of directors of the Bank is composed of the directors' compensation and retirement benefits.

In light of the special nature of the Bank's role as the central bank for cooperatives, as well as financial institution for farmers, fishermen and foresters, and trends in cooperative organizations and other business sectors, director compensation is determined on the basis of fixed compensation by director's rank, combined with variable compensation in accordance with the status of progress on the initiatives of the Bank's management plans*—which set forth goals, etc., that help advance sustainable management, contribute to the AFF industries and local communities, reinforce the members' business base and promote employee engagement—as a sound incentive toward sustainable growth.

The ratio of fixed to variable compensation is roughly 7 to 3. Part of the variable compensation is determined according to quantitative and qualitative evaluations on the degree of accomplishment of the management plans* entered into by individual officers.

For Supervisory Committee and Audit & Supervisory Board members, from the perspective of effective functioning of their duties, only fixed compensation is paid, there being no variable compensation.

Retirement benefits are calculated by applying a fixed weighting based on a director's compensation during his or her term of office in line with the retirement benefit payment rules.

The decision-making process for the retirement benefits is as follows. Proposals presented for total director

** Annual initiatives based on the medium-term vision from fiscal 2024*

compensation and retirement benefits are decided by the Supervisory Committee based on the results of the Committee's discussions. These proposals are then ultimately discussed and decided at the Council of Delegates.

Within the limits of total compensation decided at the Council of Delegates, the compensation of directors is decided at the Board of Directors meeting and the compensation of Audit & Supervisory Board members is decided through Audit & Supervisory Board members consultation.

In addition, following a resolution at the Council of Delegates, the actual amount of retirement benefits is decided at the Board of Directors meeting for Board members and through Audit & Supervisory Board members consultation for Audit & Supervisory Board members.

● Compensation Policy for the Subject Employees

For the compensation of Subject Employees, salaries are determined corresponding to the grade and role played. In addition, with regard to the portion of bonus that is aligned to performance, appropriate determinations are made based on a comprehensive assessment that considers both quantitative and qualitative aspects to ensure the system does not become excessively results-oriented.

Nevertheless, for overseas locally hired employees, etc., compensation may be set individually, taking account of local compensation customs and factors including the duties, business characteristics and market value of the relevant employee, while being mindful of this policy and observing local compensation regulations.

3. The Bank's Compensation Structure for the Subject Directors and Employees, etc., Its Risk Management Consistency, and the Link between Compensation and Performance

As described in the previous section, the final decision on the Subject Directors' total compensation is decided at the Council of Delegates. The Bank's compensation

structure has no adverse effect on risk management, nor is it disproportionately linked to performance.

4. Other Matters for Reference Concerning the Bank's Compensation Structure for the Subject Directors and Employees

Aside from that mentioned in the preceding paragraph, no matters fall under this category.

Voting Rights of Members

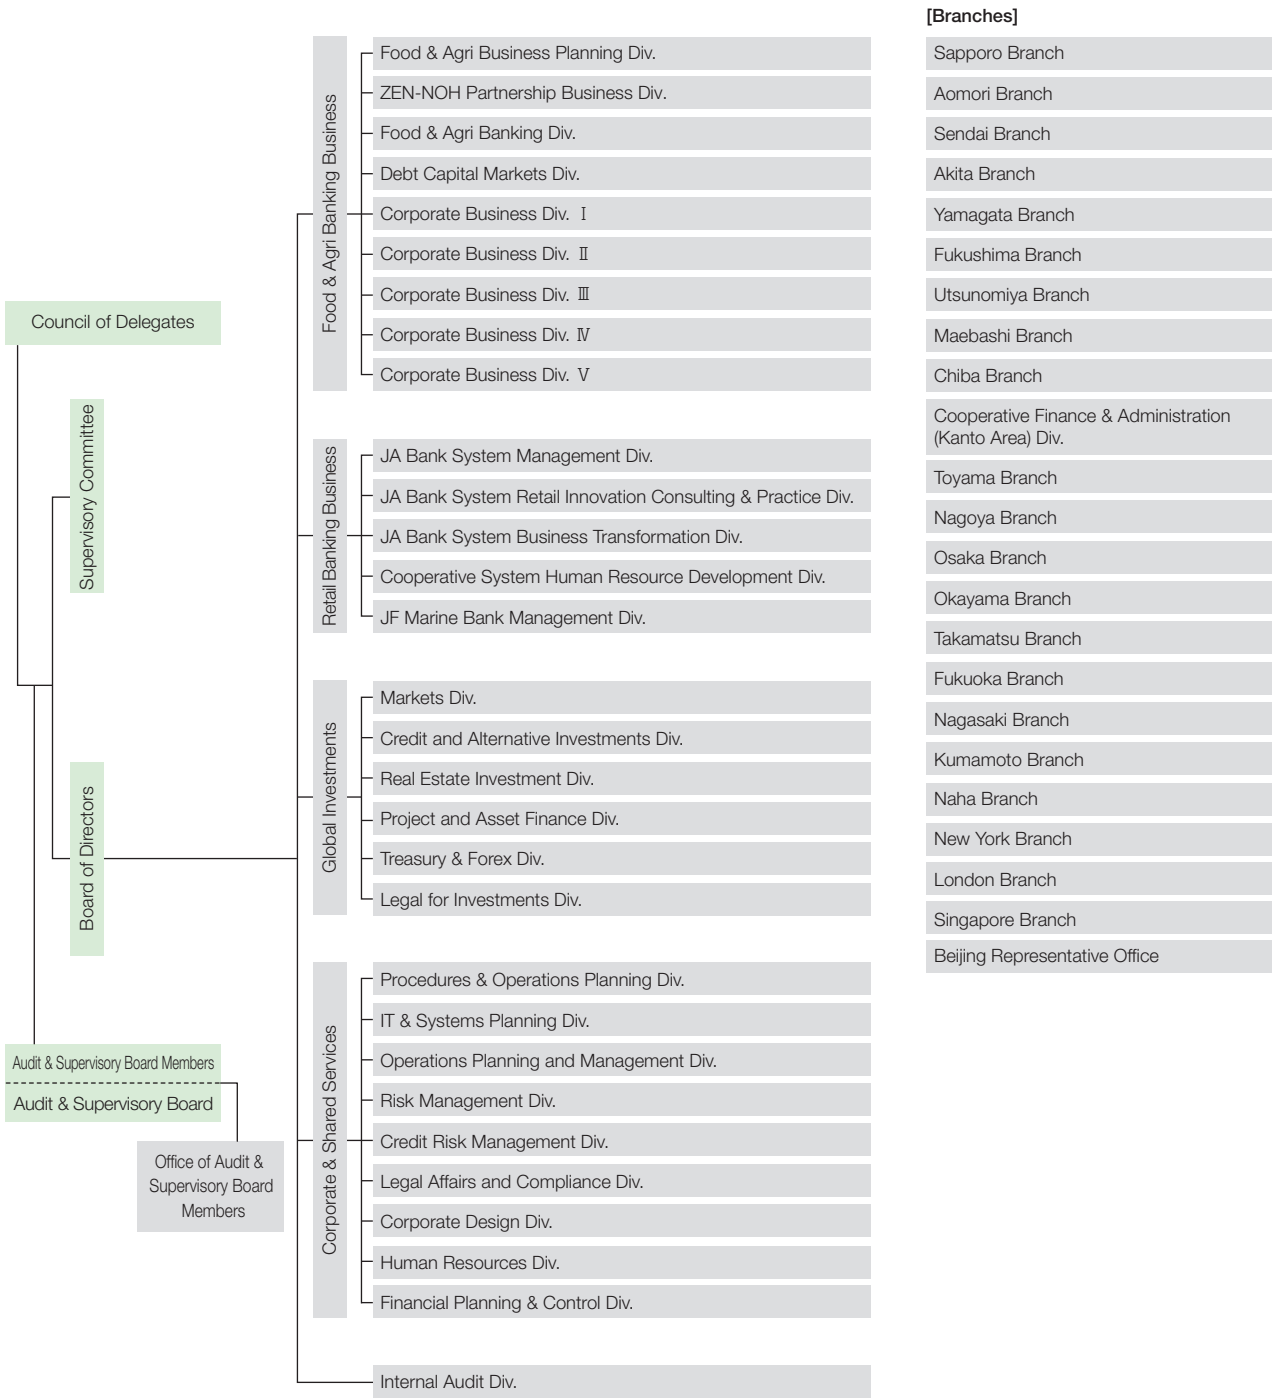

The Norinchukin Bank is the central financial institution for Japan's agricultural, fishery and forest owners' cooperative system. The supreme management decision-making organization for the Bank is basically the Council of Delegates, which consists of representative members and substitutes for the general meetings of all shareholders. Unlike stock companies, where one share represents one vote, the voting rights of the members of the Council of Delegates are equal in principle regardless of the number of investment units they own. For this reason, a list of major shareholders has not been included in this report.
